SUBCONTRACT ISSUES AND DISPUTES (SPECIAL) (SEP 2007)

Derived from **NREL 08.100-01**

(Applies to all subcontracts.)

- (a) It is NREL's practice to try to resolve all contractual issues by mutual agreement at the NREL Subcontract Administrator's level, without litigation. Both parties hereby agree to explore all reasonable avenues for negotiations in order to avoid a dispute. Either party may provide written notice to the other party to conduct negotiations for a period not to exceed sixty (60) calendar days. After sixty calendar days, if possibilities for negotiations have failed, either party shall have thirty (30) calendar days to request that the potential dispute be moved to Alternative Dispute Resolution (ADR). Within fifteen (15) calendar days after receiving a request to move to ADR, if ADR procedures are not acceptable to the non-moving party, a written explanation citing specific reasons for rejecting ADR as inappropriate for resolution of the dispute shall be provided to the moving party. If the parties are unable to agree on the application of ADR procedures to resolve the potential dispute or are unable to satisfactorily resolve the dispute using ADR procedures for a period not to exceed ninety (90) calendar days (or such longer period as mutually agreed in writing), the parties shall resume the formal process authorized in this clause.
- (b) The parties agree that the appropriate forum for litigation of any dispute pertaining to this subcontract shall be a court of competent jurisdiction as follows:
 - (1) Subject to paragraph (b) (2) of this clause, any such litigation shall be brought and prosecuted exclusively in Federal District Court; with venue in the United States District Court of Colorado in Denver, Colorado.
 - (2) Provided, however, that in the event the requirements for jurisdiction in any Federal District Court are not present, such litigation shall be brought in a court of competent jurisdiction in the county of Jefferson and State of Colorado.
- (c) Any substantive issue of law in such litigation shall be determined in accordance with the body of applicable Federal law relating to the interpretation and application of clauses derived from Federal Acquisition Regulation (FAR) and the Department of Energy Acquisition Regulation that implement and supplement the FAR. If there is no applicable Federal law, the law of the State of Colorado shall apply in the determination of such issues. Conflict of law provisions shall not determine applicable governing law. Nothing in this clause shall grant the Subcontractor by implication any statutory rights or remedies not expressly set forth in this subcontract.
- (d) There shall be no interruption in the prosecution of the work, and the Subcontractor shall proceed diligently with the performance of this subcontract pending final resolution of any contractual issues, disputes, or litigation arising under or related to this subcontract between the parties hereto or between the Subcontractor and lower-tier Subcontractors or suppliers.
- (e) The Contract Disputes Act of 1978 (41 U.S.C. Sections 601-613) shall not apply to this subcontract; provided, however, that nothing in this clause shall prohibit NREL, in its sole discretion, from sponsoring a dispute of the Subcontractor for resolution under the provision of its prime contract with DOE. In the event that NREL so sponsors a dispute at the request of the Subcontractor, the Subcontractor shall be bound by the decision of the cognizant DOE Contracting Officer to the same extent and in the same manner as NREL.

The Subcontractor shall promptly replace the counterfeit or suspect items or parts with supplies acceptable to NREL and the Subcontractor shall be liable for all costs relating to impoundment, removal, and replacement.

SYSTEM FOR AWARD MANAGEMENT MAINTENANCE (NOV 2019)

Derived from FAR 52.204-13 (OCT 2018)

(Applies to all subcontracts.)

(a) Definitions. As used in this clause—

“Electronic Funds Transfer (EFT) indicator” means a four-character suffix to the unique entity identifier. The suffix is assigned at the discretion of the commercial, nonprofit, or Government entity to establish additional System for Award Management (SAM) records for identifying alternative EFT accounts (see subpart 32.11) for the same entity.

“Registered in the System for Award Management (SAM)” means that—

- (1) The subcontractor has entered all mandatory information, including the unique entity identifier and the EFT indicator (if applicable), the Commercial and Government Entity (CAGE) code, as well as data required by the Federal Funding Accountability and Transparency Act of 2006 (see subpart 4.14), into SAM;
- (2) The subcontractor has completed the Core, Assertions, Representations and Certifications, and Points of Contact sections of the registration in SAM;
- (3) The Government has validated all mandatory data fields, to include validation of the Taxpayer Identification Number (TIN) with the Internal Revenue Service (IRS). The subcontractor will be required to provide consent for TIN validation to the Government as a part of the SAM registration process; and
- (4) The Government has marked the record “Active”.

“System for Award Management (SAM)” means the primary Government repository for prospective Federal awardee and Federal awardee information and the centralized Government system for certain contracting, grants, and other assistance-related processes. It includes—

- (1) Data collected from prospective Federal awardees required for the conduct of business with the Government;
- (2) Prospective subcontractor-submitted annual representations and certifications in accordance with FAR subpart 4.12; and
- (3) Identification of those parties excluded from receiving Federal contracts, certain subcontracts, and certain types of Federal financial and non-financial assistance and benefits.

“Unique entity identifier” means a number or other identifier used to identify a specific commercial, nonprofit, or Government entity. See www.sam.gov for the designated entity for establishing unique entity identifiers.

- (c) The subcontractor shall maintain registration in SAM during subcontract performance and through final payment of any subcontract, basic agreement, basic ordering agreement, or blanket purchasing agreement. The subcontractor is responsible for the currency, accuracy and completeness of the data within SAM, and for any liability resulting from NREL and the Government’s reliance on inaccurate or incomplete data. To remain registered in SAM after the initial registration, the subcontractor is required to review and update on an annual basis, from the date of initial registration or subsequent updates, its information in SAM to ensure it is current, accurate and

Standard Terms and Conditions for Technical Services Including:

(where the Service Contract Act does NOT apply)

- complete. Updating information in SAM does not alter the terms and conditions of this subcontract and is not a substitute for a properly executed contractual document.
- (d)
- (1)
- (i) If a subcontractor has legally changed its business name or “doing business as” name (whichever is shown on the subcontract), or has transferred the assets used in performing the subcontract, but has not completed the necessary requirements regarding novation and change-of-name agreements in subpart 42.12, the subcontractor shall provide the responsible NREL Subcontract Administrator a minimum of one business day's written notification of its intention to—

- (2) If the Subcontractor is a religious corporation, association, educational institution, or society, the requirements of this clause do not apply with respect to the employment of individuals of a particular religion to perform work connected with the carrying on of the Subcontractor’s activities (41 CFR 60-1.5).
- (c) (1) The Subcontractor shall not discriminate against any employee or applicant for employment because of race, color, religion, sex, sexual orientation,

- (2) The Subcontractor shall take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, sexual orientation, gender identity, or national origin. This shall include, but not be limited to—

- (5)
- (i) The Subcontractor shall not discharge or in any other manner discriminate against any employee or applicant for employment because such employee or applicant has inquired about, discussed, or disclosed the compensation of the employee or applicant or another employee or applicant. This prohibition against discrimination does not apply to instances in which an employee who has access to the compensation information of other employees or applicants as a part of such employee's essential job functions discloses the compensation of such other employees or applicants to individuals who do not otherwise have access to such information, unless such disclosure is in response to a formal complaint or charge, in furtherance of an investigation, proceeding, hearing, or action, including an investigation conducted by the employer, or is consistent with the Subcontractor's legal duty to furnish information.
 - (ii) The Subcontractor shall disseminate the prohibition on discrimination in paragraph (c)(5)(i) of this clause, using language prescribed by the Director of the Office of Federal Contract Compliance Programs (OFCCP), to employees and applicants by—

- (8) The Subcontractor shall furnish to NREL all information required by Executive Order 11246, as amended, and by the rules, regulations, and orders of the Secretary of Labor. Unless the Subcontractor has filed within the twelve (12) months preceding the date of subcontract award, the Subcontractor shall, within thirty (30) days after subcontract award, apply to either the regional Office of Federal Contract Compliance Programs (OFCCP) or the local office of the Equal Employment Opportunity Commission for the necessary forms.
- (9) The Subcontractor shall permit access to its premises, during normal business hours, by NREL/the Government or the OFCCP for the purpose of conducting on-site compliance evaluations and complaint investigations. The Subcontractor shall permit the NREL/the Government to inspect and copy any books, accounts, records (including computerized records), and other material that may be relevant to the matter under investigation and pertinent to compliance with Executive Order 11246, as amended, and rules and regulations that implement the Executive Order.
- (10) If the OFCCP determines that the Subcontractor is not in compliance with this clause or any rule, regulation, or order of the Secretary of Labor, this subcontract may be canceled, terminated, or suspended in whole or in part and the Subcontractor may be declared ineligible for further NREL/ Government contracts/subcontracts, under the procedures authorized in Executive Order 11246, as amended. In addition, sanctions may be imposed and remedies invoked against the Subcontractor as provided in Executive Order 11246, as amended; in the rules, regulations, and orders of the Secretary of Labor; or as otherwise provided by law.
- (11) The Subcontractor shall include the terms and conditions of this clause in every lower-tier subcontract or purchase order that is not exempted by the rules, regulations, or orders of the Secretary of Labor issued under Executive Order 11246, as amended, so that these terms and conditions will be binding upon each lower-tier Subcontractor or vendor.
- (12) The Subcontractor shall take such action with respect to any lower-tier subcontract or purchase order as the NREL Subcontract Administrator may direct as a means of enforcing these terms and conditions, including sanctions for noncompliance, provided, that if the Subcontractor becomes involved in, or is threatened with, litigation with a lower-tier Subcontractor or vendor as a result of any direction, the Subcontractor may request the United States to enter into the litigation to protect the interests of the United States.
- (d) Notwithstanding any other clause in this subcontract, disputes relative to this clause will be governed by the procedures in 41 CFR Part 60-1.1.

 - (2) If this is a cost sharing subcontract, NREL's share of the estimated cost specified in the subcontract schedule.
- The Subcontractor agrees to use its best efforts to perform the work specified in the subcontract schedule and all obligations under this subcontract within the estimated cost, which, if this is a cost sharing subcontract, includes both NREL's and the Subcontractor's share of the cost.
- (b) The Subcontractor shall notify the NREL Subcontract Administrator in writing whenever it has reason to believe that—
- (1) The costs the Subcontractor expects to incur under this subcontract in the next sixty (60) days, when added to all costs previously incurred, will exceed seventy-five (75) percent of the estimated cost specified in the subcontract schedule; or
 - (2) The total cost for the performance of this subcontract, exclusive of any fee, will be either greater or substantially less than had been previously estimated.
- (c) As part of the notification, the Subcontractor shall provide the NREL Subcontract Administrator a revised estimate of the total cost of performing this subcontract.
- (d) Except as required by other provisions of this subcontract, specifically citing and stated to be an exception to this clause—

 - (ii) Notifies the Subcontractor in writing that the estimated cost has been increased and

- (f) If the estimated cost specified in the subcontract schedule is increased, any costs the Subcontractor incurs before the increase that are in excess of the previously

LIMITATION OF FUNDS (APR 1984)

Derived from FAR 52.232-22 (APR 1984)

Applies to incrementally funded cost type subcontracts.

- (a) The parties estimate that performance of this subcontract will not cost NREL more than—
- (1) The estimated cost specified in the subcontract schedule; or,
 - (2) If this is a cost sharing subcontract, NREL's share of the estimated cost specified in the subcontract schedule.

- (b) The subcontract schedule specifies the amount presently available for payment by NREL and allotted to this subcontract, the items covered, NREL's share of the cost if this is a cost sharing subcontract, and the period of performance it is estimated the allotted amount will cover. The parties contemplate that NREL will allot additional funds incrementally to the subcontract up to the full estimated cost to NREL specified in the subcontract schedule, exclusive of any fee. The Subcontractor agrees to perform, or have performed, work on the subcontract up to the point at which the total amount paid and payable by NREL under the subcontract approximates but does not exceed the total amount actually allotted by NREL to the subcontract.
- (c) The Subcontractor shall notify the NREL Subcontract Administrator in writing whenever it has reason to believe that the costs it expects to incur under this subcontract in the next sixty (60) days, when added to all costs previously incurred, will exceed seventy-five (75) percent of—

- (e) If, after notification, additional funds are not allotted by the end of the period specified in the subcontract schedule or another agreed upon date, upon the Subcontractor's written request the NREL Subcontract Administrator will terminate this subcontract on that date in accordance with the provisions of the Termination clause of this subcontract. If the Subcontractor estimates that the funds available will allow it to continue to discharge its obligations beyond that date, it may specify a later date in its request, and the NREL Subcontract Administrator may terminate this subcontract on that later date.
- (f) Except as required by other provisions of this subcontract, specifically citing and stated to be an exception to this clause—
- (1) NREL is not obligated to reimburse the Subcontractor for costs incurred in excess of the total amount allotted by NREL to this subcontract; and

In the absence of the specified notice, NREL is not obligated to reimburse the Subcontractor for any costs in excess of the total amount allotted by NREL to this subcontract, whether incurred during the course of the subcontract or as a result of termination.
- (i) When and to the extent that the amount allotted by NREL to the subcontract is increased, any costs the Subcontractor incurs before the increase that are in excess of—
- (1) The amount previously allotted by NREL; or,
 - (2) If this is a cost sharing subcontract, the amount previously allotted by NREL to the subcontract plus the Subcontractor's corresponding share.
- Shall be allowable to the same extent as if incurred afterward, unless the NREL Subcontract Administrator issues a termination or other notice and directs that the increase is solely to cover termination or other specified expenses.
- (j) Change orders shall not be considered an authorization to exceed the amount allotted by NREL specified in the subcontract schedule, unless they contain a statement increasing the amount allotted.
- (k) Nothing in this clause shall affect the right of NREL to terminate this subcontract. If this subcontract is terminated, NREL and the Subcontractor shall negotiate an equitable distribution of all property produced or purchased under the subcontract, based upon the costs incurred by each.

NREL/Government shall perform inspections and tests in a manner that will not unduly delay the work.
- (d) If NREL/Government performs inspection(s) or test(s) on the premises of the Subcontractor or a lower-tier Subcontractor, the Subcontractor shall furnish, and shall require lower-tier Subcontractors to furnish, all reasonable facilities and assistance for the safe and convenient performance of these duties.
- (e) Unless otherwise specified in the subcontract, NREL shall accept or reject services and materials at the place of delivery as promptly as practicable after delivery, and they shall be presumed accepted sixty (60) days after the date of delivery, unless accepted earlier.
- (f) At any time during subcontract performance, but not later than six (6) months (or such other time as may be specified in the subcontract) after acceptance of the services or materials last delivered under this subcontract, NREL may require the Subcontractor to replace or correct services or materials that at time of delivery failed to meet subcontract requirements. Except as otherwise specified in paragraph (h) of this clause, the cost of replacement or correction shall be determined under the Payments Under Time-and-Materials and Labor-Hour and Expenses Subcontracts clause, but the "hourly rate" for labor hours incurred in the replacement or correction shall be reduced to exclude that portion of the rate attributable to profit. The Subcontractor shall not tender for acceptance materials and services required to be replaced or corrected without disclosing the former requirement for replacement or correction, and, when required, shall disclose the corrective action taken.
- (g) (1) If the Subcontractor fails to proceed with reasonable promptness to perform required replacement or correction, and if the replacement or correction can

- (ii) By subcontract or otherwise, perform the replacement or correction, charge to the Subcontractor any increased cost, or deduct such increased cost from any amounts paid or due under this subcontract; or
 - (iii) Terminate this subcontract for default.
- (2) Failure to agree to the amount of increased cost to be charged to the Subcontractor shall be a dispute.
- (h) Notwithstanding paragraphs (f) and (g) above, NREL may at any time require the Subcontractor to remedy by correction or replacement, without cost to NREL, any failure by the Subcontractor to comply with the requirements of this subcontract, if the failure is due to—
- (1) Fraud, lack of good faith, or willful misconduct on the part of the Subcontractor's managerial personnel; or
 - (2) The conduct of one or more of the Subcontractor's employees selected or retained by the Subcontractor after any of the Subcontractor's managerial personnel has reasonable grounds to believe that the employee is habitually careless or unqualified.
- (i) This clause applies in the same manner and to the same extent to corrected or replacement materials or services as to materials and services originally delivered under this subcontract.
- (j) The Subcontractor has no obligation or liability under this subcontract to correct or replace materials and services that at time of delivery do not meet subcontract requirements, except as provided in this clause or as may be otherwise specified in the subcontract.
- (k) Unless otherwise specified in the subcontract, the Subcontractor's obligation to correct or replace NREL/Government-furnished property shall be governed by the clause pertaining to NREL/Government property.

**TERMINATION (COST REIMBURSEMENT) (MAY 2004) MODIFIED BY DEAR 970.4905-1,
 ALTERNATE IV (TIME AND MATERIAL OR LABOR HOUR) (SEP 1996)**

Derived from FAR 52.249-6 (FD)

(Applies to cost type subcontracts except research and development subcontracts with an educational or nonprofit institution on a no-fee basis.)

(Alternate IV applies to Time and Material and Labor Hour and Expenses subcontracts.)

- (a) NREL may terminate performance of work under this subcontract in whole or, from time to time, in part, if—
 - (1) The NREL Subcontract Administrator determines that a termination is in the NREL/Government's interest; or
 - (2) The Subcontractor defaults in performing this subcontract and fails to cure the default within ten (10) days (unless extended by the NREL Subcontract Administrator) after receiving a notice specifying the default.
 - (ii) "Default," as used in this clause, includes failure to make progress in the work so as to endanger performance.
- (b) The NREL Subcontract Administrator shall terminate by delivering to the Subcontractor a Notice of Termination specifying whether termination is for default of the Subcontractor or for convenience of NREL/Government, the extent of termination, and the effective date. If, after termination for default, it is determined that the Subcontractor was not in default or that the Subcontractor's failure to perform or to make progress in performance is due to causes beyond the control and without the fault or negligence of the Subcontractor as set forth in the Excusable Delays clause, the rights and obligations of the parties will be the same as if the termination was for the convenience of the NREL/Government.
- (c) After receipt of a Notice of Termination, and except as directed by the NREL Subcontract Administrator, the Subcontractor shall immediately proceed with the following obligations, regardless of any delay in determining or adjusting any amounts due under this clause:
 - (1) Stop work as specified in the notice.
 - (2) Place no further lower-tier subcontracts or orders (referred to as lower-tier subcontracts in this clause), except as necessary to complete the continued portion of the subcontract.
 - (3) Terminate all lower-tier subcontracts to the extent they relate to the work terminated.
 - (4) Assign to NREL, as directed by the NREL Subcontract Administrator, all right, title, and interest of the Subcontractor under the lower-tier subcontracts terminated, in which case NREL shall have the right to settle or to pay any termination settlement proposal arising out of those terminations.
 - (5) With approval or ratification to the extent required by the NREL Subcontract Administrator, settle all outstanding liabilities and termination settlement proposals arising from the termination of lower-tier subcontracts, the cost of which would be reimbursable in whole or in part, under this subcontract; approval or ratification will be final for purposes of this clause.
 - (6) Transfer title to the Government (if not already transferred) and, as directed by the NREL Subcontract Administrator, deliver to the NREL—
 - (ii) The fabricated or unfabricated parts, work in process, completed work, supplies, and other material produced or acquired for the work terminated;

Standard Terms and Conditions for Technical Services Including:

- (1) Labor Hour, (2) Labor Hour and Expenses, and (3) Consultant Agreements
(where the Service Contract Act does NOT apply)

- (iii) The completed or partially completed plans, drawings, information, and other property that, if the subcontract had been completed, would be required to be furnished to the NREL; and
 - (iv) The jigs, dies, fixtures, and other special tools and tooling acquired or manufactured for this subcontract, the cost of which the Subcontractor has been or will be reimbursed under this subcontract.
- (7) Complete performance of the work not terminated.
- (8) Take any action that may be necessary, or that the NREL Subcontract Administrator may direct, for the protection and preservation of the property related to this subcontract that is in the possession of the Subcontractor and in which the NREL/Government has or may acquire an interest.
- (9) Use its best efforts to sell, as directed or authorized by the NREL Subcontract Administrator, any property of the types referred to in paragraph (c)(6) of this clause; provided, however, that the Subcontractor
 - (ii) Is not required to extend credit to any purchaser and
 - (iii) May acquire the property under the conditions prescribed by, and at prices approved by, the NREL Subcontract Administrator. The proceeds of any transfer or disposition will be applied to reduce any payments to be made by NREL under this subcontract, credited to the price or cost of the work, or paid in any other manner directed by the NREL Subcontract Administrator.
- (d) The Subcontractor shall submit complete termination inventory subcontract schedules no later than one hundred twenty (120) days from the effective date of termination, unless extended in writing by the NREL Subcontract Administrator upon written request of the Subcontractor within this one hundred twenty (120) day period.
- (e) After expiration of the plant clearance period as defined in Subpart [49.001](#) of the Federal Acquisition Regulation, the Subcontractor may submit to the NREL Subcontract Administrator a list, certified as to quantity and quality, of termination inventory not previously disposed of, excluding items authorized for disposition by the NREL Subcontract Administrator. The Subcontractor may request the NREL/Government to remove those items or enter into an agreement for their storage. Within fifteen (15) days, NREL/Government will accept the items and remove them or enter into a storage agreement. The NREL Subcontract Administrator may verify the list upon removal of the items, or if stored, within forty five (45) days from submission of the list, and shall correct the list, as necessary, before final settlement.
- (f) After termination, the Subcontractor shall submit a final termination settlement proposal to the NREL Subcontract Administrator in the form and with the certification prescribed by the NREL Subcontract Administrator. The Subcontractor shall submit the proposal promptly, but no later than one (1) year from the effective date of termination, unless extended in writing by Subcontract Administrator upon written request of the Subcontractor within this one (1) year period. However, if the NREL Subcontract Administrator determines that the facts justify it, a termination settlement proposal may be received and acted on after one (1) year or any extension. If the Subcontractor fails to submit the proposal within the time allowed, the NREL Subcontract Administrator may determine, on the basis of information available, the amount, if any, due the Subcontractor because of the termination and shall pay the amount determined.
- (g) Subject to paragraph (f) of this clause, the Subcontractor and the NREL Subcontract Administrator may agree on the whole or any part of the amount to be paid (including

Standard Terms and Conditions for Technical Services Including:

- (1) Labor Hour, (2) Labor Hour and Expenses, and (3) Consultant Agreements

- an allowance for fee) because of the termination. The subcontract shall be amended, and the Subcontractor paid the agreed amount.
- (h) If the Subcontractor and the NREL Subcontract Administrator fail to agree in whole or in part on the amount of costs and/or fee to be paid because of the termination of work, the NREL Subcontract Administrator shall determine, on the basis of information available, the amount, if any, due the Subcontractor, and shall pay that amount, which shall include the following:
- (1) All costs reimbursable under this subcontract, not previously paid, for the performance of this subcontract before the effective date of the termination, and those costs that may continue for a reasonable time with the approval of or as directed by the NREL Subcontract Administrator; however, the Subcontractor shall discontinue those costs as rapidly as practicable.
 - (2) The cost of settling and paying termination settlement proposals under terminated lower-tier subcontracts that are properly chargeable to the terminated portion of the contract if not included in paragraph (h)(1) of this clause.
 - (3) The reasonable costs of settlement of the work terminated, including—
 - (ii) Accounting, legal, clerical, and other expenses reasonably necessary for the preparation of termination settlement proposals and supporting data;
 - (iii) The termination and settlement of lower-tier subcontracts (excluding the amounts of such settlements); and
 - (iv) Storage, transportation, and other costs incurred, reasonably necessary for the preservation, protection, or disposition of the termination inventory. If the termination is for default, no amounts for the preparation of the Subcontractor's termination settlement proposal may be included.
 - (4) A portion of the fee payable under the subcontract, determined as follows:
 - (ii) If the subcontract is terminated for the convenience of the NREL/Government, the settlement shall include a percentage of the fee equal to the percentage of completion of work contemplated under the contract, but excluding lower-tier subcontract effort included in lower-tier Subcontractors' termination proposals, less previous payments for fee.
 - (iii) If the subcontract is terminated for default, the total fee payable shall be such proportionate part of the fee as the total number of articles (or amount of services) delivered to and accepted by NREL is to the total number of articles (or amount of services) of a like kind required by the subcontract.
 - (5) If the settlement includes only fee, it will be determined under paragraph (h) (4) of this clause.
- (i) The cost principles and procedures in Part 31 of the Federal Acquisition Regulation, as supplemented in subpart 970.31 of the Department of Energy Acquisition Regulation, in effect on the date of this subcontract, shall govern all costs claimed, agreed to, or determined under this clause.
- (j) The Subcontractor shall have the right of appeal, under the Disputes clause, from any determination made by the NREL Subcontract Administrator under paragraph (f), (h), or (l) of this clause, except that if the Subcontractor failed to submit the termination settlement proposal within the time provided in paragraph (f) and failed to request a time extension, there is no right of appeal. If the NREL Subcontract

- Administrator has made a determination of the amount due under paragraph (f), (h) or (l) of this clause, NREL shall pay the Subcontractor—
- (1) The amount determined by the NREL Subcontract Administrator if there is no right of appeal or if no timely appeal has been taken; or
 - (2) The amount finally determined on an appeal.
- (k) In arriving at the amount due the Subcontractor under this clause, there shall be deducted—
- (1) All unliquidated advance or other payments to the Subcontractor, under the terminated portion of this subcontract;
 - (2) Any claim which the NREL/Government has against the Subcontractor under this subcontract; and
 - (3) The agreed price for, or the proceeds of sale of materials, supplies, or other things acquired by the Subcontractor or sold under this clause and not recovered by or credited to NREL/Government.
- (l) The Subcontractor and NREL Subcontract Administrator must agree to any equitable adjustment in fee for the continued portion of the subcontract when there is a partial termination. The NREL Subcontract Administrator shall amend the subcontract to reflect the agreement.
- (m) (1) NREL/Government may, under the terms and conditions it prescribes, make partial payments and payments against costs incurred by the Subcontractor for the terminated portion of the subcontract, if the NREL Subcontract Administrator believes the total of these payments will not exceed the amount to which the Subcontractor will be entitled.
- (2) If the total payments exceed the amount finally determined to be due, the Subcontractor shall repay the excess upon demand, together with interest computed at the rate established by the Secretary of the Treasury under 50 U.S.C. App. 1215(b)(2). Interest shall be computed for the period from the date the excess payment is received by the Subcontractor to the date the excess is repaid. Interest shall not be charged on any excess payment due to a reduction in the Subcontractor's termination settlement proposal because of retention or other disposition of termination inventory until ten (10) days after the date of the retention or disposition, or a later date determined by the NREL Subcontract Administrator because of the circumstances.
- (n) The provisions of this clause relating to fee are inapplicable if this subcontract does not include a fee.

ALTERNATE IV (SEP 1996).

If the subcontract is a time-and-material or labor-hour subcontract, substitute the following paragraphs (h) and (l) for paragraphs (h) and (l) of the basic clause:

- (a) If the Subcontractor and the NREL Subcontract Administrator fail to agree in whole or in part on the amount to be paid because of the termination of work, the NREL Subcontract Administrator shall determine, on the basis of information available, the amount, if any, due the Subcontractor and shall pay the amount determined as follows:
- (1) If the termination is for the convenience of NREL/Government, include—
 - (i) An amount for direct labor hours (as defined in the subcontract schedule) determined by multiplying the number of direct labor hours expended before the effective date of termination by the hourly rate(s) in the subcontract schedule, less any hourly rate payments already made to the Subcontractor;

Standard Terms and Conditions for Technical Services Including:

- (ii) An amount (computed under the provisions for payment of materials) for material expenses incurred before the effective date of termination, not previously paid to the Subcontractor;
 - (iii) An amount for labor and material expenses computed as if the expenses were incurred before the effective date of termination, if they are reasonably incurred after the effective date, with the approval of or as directed by the NREL Subcontract Administrator; however, the Subcontractor shall discontinue these expenses as rapidly as practicable;
 - (iv) If not included in subdivision (h)(1)(i), (ii), or (iii) of this clause, the cost of settling and paying termination settlement proposals under terminated lower-tier subcontracts that are properly chargeable to the terminated portion of the subcontract; and
 - (v) The reasonable costs of settlement of the work terminated, including—
 - (A) Accounting, legal, clerical, and other expenses reasonably necessary for the preparation of termination settlement proposals and supporting data;

 - (C) Storage, transportation, and other costs incurred, reasonably necessary for the protection or disposition of the termination inventory.
- (2) If the termination is for default of the Subcontractor, include the amounts computed under paragraph (h)(1) of this clause but omit—
- (ii) Any amount for preparation of the Subcontractor's termination settlement proposal; and
 - (iii) The portion of the hourly rate allocable to profit for any direct labor hours expended in furnishing materials and services not delivered to and accepted by NREL.

* * * * *

(b) If the termination is partial, the Subcontractor may file with the NREL Subcontract Administrator a proposal for an equitable adjustment of price(s) for the continued portion of the subcontract. The NREL Subcontract Administrator shall make any equitable adjustment agreed upon. Any proposal by the Subcontractor for an equitable adjustment under this clause shall be requested within ninety (90) days from the effective date of termination, unless extended in writing by the NREL Subcontract Administrator.

- (1) The lower-tier subcontracted supplies or services were obtainable from other sources;
 - (2) The NREL Subcontract Administrator ordered the Subcontractor in writing to purchase these supplies or services from the other source; and
 - (3) The Subcontractor failed to comply reasonably with this order.

(Applies to all subcontracts where Subcontractor employees have access to computers owned, leased, or operated on behalf of DOE.)

- (a) Definitions.
- (1) Computer means desktop computers, portable computers, computer networks (including the DOE Network and local area networks at or controlled by DOE organizations), network devices, automated information systems, and or other related computer equipment owned by, leased, or operated on behalf of the DOE.
 - (2) Individual means an NREL/DOE [Sub]Contractor or lower-tier subcontractor employee, or any other person who has been granted access to a DOE computer or to information on a DOE computer and does not include a member of the public who sends an email message to a DOE computer or who obtains information available to the public on DOE Web sites.
- (b) Access to DOE computers. A Subcontractor shall not allow an individual to have access to information on a DOE computer unless—
- (1) The individual has acknowledged in writing that the individual has no expectation of privacy in the use of a DOE computer; and
 - (2) The individual has consented in writing to permit access by an authorized investigative agency to any DOE computer used during the period of that individual's access to information on a DOE computer, and for a period of three years thereafter.
- (c) No expectation of privacy. Notwithstanding any other provision of law (including any provision of law enacted by the Electronic Communications Privacy Act of 1986), no individual using a DOE computer shall have any expectation of privacy in the use of that computer.
- (d) Written records. The Subcontractor is responsible for maintaining written records for itself and lower-tier subcontractors demonstrating compliance with the provisions of paragraph (b) of this section. The Subcontractor agrees to provide access to these records to the DOE, its authorized agents, or the NREL Subcontract Administrator upon request.
- (e) Lower-tier Subcontracts. The Subcontractor shall insert this clause, including this paragraph (e), in lower-tier subcontracts under this subcontract that may provide access to computers owned, leased, or operated on behalf of the DOE.

RESEARCH MISCONDUCT (JUL 2005)

Derived from DEAR 952.235-71 (FD)

(Applies to all subcontracts where the Subcontractor will propose, perform, or review research of any kind.)

- (a) The Subcontractor is responsible for maintaining the integrity of research performed pursuant to this subcontract award including the prevention, detection, and remediation of research misconduct as defined by this clause, and the conduct of inquiries, investigations, and adjudication of allegations of research misconduct in accordance with the requirements of this clause.
- (b) Unless otherwise instructed by the NREL Subcontract Administrator, the Subcontractor must conduct an initial inquiry into any allegation of research misconduct. If the Subcontractor determines that there is sufficient evidence to proceed to an investigation, it must notify the NREL Subcontract Administrator and, unless otherwise instructed, the Subcontractor must:
 - (1) Conduct an investigation to develop a complete factual record and an examination of such record leading to either a finding of research misconduct and an identification of appropriate remedies or a determination that no further action is warranted;
 - (2) Conduct adjudication, if the investigation leads to a finding of research misconduct, by a responsible official who was not involved in the inquiry or investigation and is separated organizationally from the element which conducted the investigation. The adjudication must include a review of the investigative record and, as warranted, a determination of appropriate corrective actions and sanctions.
 - (3) Inform the NREL Subcontract Administrator if an initial inquiry supports a formal investigation and, if requested by the NREL Subcontract Administrator thereafter, keep the NREL Subcontract Administrator informed of the results of the investigation and any subsequent adjudication. When an investigation is complete, the Subcontractor will forward to the NREL Subcontract Administrator a copy of the evidentiary record, the investigative report, any recommendations made to the Subcontractor's adjudicating official, and the adjudicating official's decision and notification of any corrective action taken or planned, and the subject's written response (if any).
- (c) NREL/DOE may elect to act in lieu of the Subcontractor in conducting an inquiry or investigation into an allegation of research misconduct if the NREL Subcontract Administrator finds that:
 - (1) The research organization is not prepared to handle the allegation in a manner consistent with this clause;
 - (2) The allegation involves an entity of sufficiently small size that it cannot reasonably conduct the inquiry;
 - (3) NREL/DOE involvement is necessary to ensure the public health, safety, and security, or to prevent harm to the public interest; or
 - (4) The allegation involves possible criminal misconduct.
- (d) In conducting the activities under paragraphs (b) and (c) of this clause, the Subcontractor and NREL, if it elects to conduct the inquiry or investigation, shall adhere to the following guidelines:
 - (1) Safeguards for information and subjects of allegations. The Subcontractor shall provide safeguards to ensure that individuals may bring allegations of research misconduct made in good faith to the attention of the Subcontractor

Standard Terms and Conditions for Technical Services Including:

- (1) Labor Hour, (2) Labor Hour and Expenses, and (3) Consultant Agreements
(where the Service Contract Act does NOT apply)

without suffering retribution. Safeguards include: protection against retaliation; fair and objective procedures for examining and resolving allegations; and diligence in protecting positions and reputations. The Subcontractor shall also provide the subjects of allegations confidence that their rights are protected and that the mere filing of an allegation of research misconduct will not result in an adverse action. Safeguards include timely written notice regarding substantive allegations against them, a description of the allegation and reasonable access to any evidence submitted to support the allegation or developed in response to an allegation, and notice of any findings of research misconduct.

- (2) Objectivity and Expertise. The Subcontractor shall select individual(s) to inquire, investigate, and adjudicate allegations of research misconduct that have appropriate expertise and have no unresolved conflict of interest. The individual(s) who conduct(s) adjudication must not be the same individual(s) who conducted the inquiry or investigation, and must be separate organizationally from the element that conducted the inquiry or investigation.
- (3) Timeliness. The Subcontractor shall coordinate, inquire, investigate, and adjudicate allegations of research misconduct promptly, but thoroughly. Generally, an investigation should be completed within one hundred twenty (120) days of initiation, and adjudication should be complete within sixty (60) days of receipt of the record of investigation.
- (4) Confidentiality. To the extent possible, consistent with fair and thorough processing of allegations of research misconduct and applicable law and regulation, knowledge about the identity of the subjects of allegations, and informants should be limited to those with a need to know.
- (5) Remediation and Sanction. If the Subcontractor finds that research misconduct has occurred, it shall assess the seriousness of the misconduct and its impact on the research completed or in process. The Subcontractor must take all necessary corrective actions. Such actions may include, but are not limited to, correcting the research record and as appropriate imposing restrictions, controls, or other parameters on research in process or to be conducted in the future. The Subcontractor must coordinate remedial actions with the NREL Subcontract Administrator. The Subcontractor must also consider whether personnel sanctions are appropriate. Any such sanction must be considered and effected consistent with any applicable personnel laws, policies, and procedures, and shall take into account the seriousness of the misconduct and its impact, whether it was done knowingly or intentionally, and whether it was an isolated event or pattern of conduct.
- (e) NREL/DOE reserves the right to pursue such remedies and other actions as it deems appropriate, consistent with the terms and conditions of the award instrument and applicable laws and regulations. However, the Subcontractor's good faith administration of this clause and the effectiveness of its remedial actions and sanctions shall be positive considerations and shall be taken into account as mitigating factors in assessing the need for such actions. If NREL/DOE pursues any such action, it will inform the subject of the action of the outcome and any applicable appeal procedures.
- (f) Definitions.
- (1) "Adjudication," as used in this clause, means a formal review of a record of investigation of alleged research misconduct to determine whether and what corrective actions and sanctions should be taken.

Such a finding requires a conclusion that there has been a significant departure from accepted practices of the relevant research community and that it be knowingly, intentionally, or recklessly committed.
 - (5) "Inquiry," as used in this clause, means information gathering and initial fact-finding to determine whether an allegation or apparent instance of misconduct warrants an investigation.

- (c) Printing services not obtained in compliance with this guidance shall result in the cost of such printing being disallowed.

COMPLIANCE WITH EXPORT CONTROL LAWS AND REGULATIONS (NOV 2015)

Derived from **DEAR 970.5225-1 (NOV 2015)**

(Applies to all subcontracts.)

- (a) The Subcontractor shall comply with all applicable U.S. export control laws and regulations.
- (b) The Subcontractor's responsibility to comply with all applicable laws and regulations exists independent of, and is not established or limited by, the information provided by this clause.
- (c) Nothing in the terms of this contract adds to, changes, supersedes, or waives any of the requirements of applicable Federal laws, Executive Orders, and regulations, including but not limited to—
 - (1) The Atomic Energy Act of 1954, as amended;
 - (2) The Arms Export Control Act (22 U.S.C. 2751 *et seq.*);
 - (3) The Export Administration Act of 1979 (50 U.S.C. app. 2401 *et seq.*), as continued under the International Emergency Economic Powers Act (Title II of Pub. L. 95-223, 91 Stat. 1626, October 28, 1977; 50 U.S.C. 1701 *et seq.*);
 - (4) Trading with the Enemy Act (50 U.S.C. App. 5(b), as amended by the Foreign Assistance Act of 1961);
 - (5) Assistance to Foreign Atomic Energy Activities (10 CFR part 810);
 - (6) Export and Import of Nuclear Equipment and Material (10 CFR part 110);
 - (7) International Traffic in Arms Regulations (ITAR) (22 CFR parts 120 through 130);
 - (8) Export Administration Regulations (EAR) (15 CFR parts 730 through 774); and
 - (9) Regulations administered by the Office of Foreign Assets Control (31 CFR parts 500 through 598).
- (d) In addition to the Federal laws and regulations cited above, National Security Decision Directive (NSDD) 189, National Policy on the Transfer of Scientific, Technical, and Engineering Information establishes a national policy that, to the maximum extent possible, the products of fundamental research shall remain unrestricted. NSDD 189 provides that no restrictions may be placed upon the conduct or reporting of federally funded fundamental research that has not received national security classification, except as provided in applicable U.S. statutes. As a result, contracts confined to the performance of unclassified fundamental research generally do not involve any export-controlled activities.
 NSDD 189 does not take precedence over statutes. NSDD 189 does not exempt any research from statutes that apply to export controls such as the Atomic Energy Act, as amended; the Arms Export Control Act; the Export Administration Act of 1979, as amended; or the U.S. International Emergency Economic Powers Act; or the regulations that implement those statutes (*e.g.*, the ITAR, the EAR, 10 CFR part 110 and 10 CFR part 810). Thus, if items (*e.g.*, commodities, software or technologies) that are controlled by U.S. export control laws or regulations are used to conduct research or are generated as part of the research efforts, the export control laws and regulations apply to the controlled items.
- (e) The Subcontractor shall include the substance of this clause, including this paragraph (e), in all solicitations and lower-tier subcontracts.

- (c) Audit of Subcontractors' records. The Subcontractor also agrees, with respect to any lower-tier subcontracts (including fixed-price or unit-price lower-tier subcontracts or purchase orders) where, under the terms of the lower-tier subcontract, costs incurred are a factor in determining the amount payable to the Subcontractor of any tier, to either conduct an audit of the lower-tier Subcontractor's costs or arrange for such an audit to be performed by the cognizant government audit agency through the NREL Subcontract Administrator.
- (d) Disposition of records. Except as agreed upon by NREL/Government and the Subcontractor, all financial and cost reports, books of account and supporting documents, system files, data bases, and other data evidencing costs allowable, collections accruing to the Subcontractor in connection with the work under this subcontract, other applicable credits, and fee accruals under this subcontract, shall be the property of the Government, and shall be delivered to NREL/Government or otherwise disposed of by the Subcontractor either as the NREL Subcontract Administrator/Contracting Officer may from time to time direct during the progress of the work or, in any event, as the NREL Subcontract Administrator/Contracting Officer shall direct upon completion or termination of this subcontract and final audit of accounts hereunder. Except as otherwise provided in this subcontract, including provisions of Clause 970.5204-3, Access to and Ownership of Records, all other records in the possession of the Subcontractor relating to this subcontract shall be preserved by the Subcontractor for a period of three years after final payment under this subcontract or otherwise disposed of in such manner as may be agreed upon by NREL/Government and the Subcontractor.
- (e) Reports. The Subcontractor shall furnish such progress reports and schedules, financial and cost reports, and other reports concerning the work under this subcontract as the NREL Subcontract Administrator/Contracting Officer may from time to time require.
- (f) Inspections. The DOE/NREL shall have the right to inspect the work and activities of the Subcontractor under this subcontract at such time and in such manner as it shall deem appropriate.

The Subcontractor further agrees to require the inclusion of provisions similar to those in paragraphs (a) through (g) and paragraph (h) of this clause in all lower-tier subcontracts (including fixed-price or unit-price subcontracts or purchase orders) entered into hereunder where, under the terms of the lower-tier subcontract, costs incurred are a factor in determining the amount payable to the lower-tier Subcontractor.
- (h) Comptroller general.
- (1) The Comptroller General of the United States, or an authorized representative, shall have access to and the right to examine any of the Subcontractor's or lower-tier Subcontractor's directly pertinent records involving transactions related to this subcontract or a lower-tier subcontract hereunder and to interview any current employee regarding such transactions.
 - (2) This paragraph may not be construed to require the Subcontractor or lower-tier Subcontractor to create or maintain any record that the Subcontractor or lower-tier Subcontractor does not maintain in the ordinary course of business or pursuant to a provision of law.
 - (3) Nothing in this subcontract shall be deemed to preclude an audit by the Government Accountability Office of any transaction under this subcontract.
- (i) Internal audit. The Subcontractor agrees to design and maintain an internal audit plan and an internal audit organization.
- (1) Upon subcontract award, the exercise of any subcontract option, or the extension of the subcontract, the Subcontractor must submit to the NREL Subcontract Administrator for approval an Internal Audit Implementation Design to include the overall strategy for internal audits. The Audit Implementation Design must describe—
 - (i) The internal audit organization's placement within the Subcontractor's organization and its reporting requirements;
 - (ii) The audit organization's size and the experience and educational standards of its staff;
 - (iii) The audit organization's relationship to the corporate entities of the Subcontractor;
 - (iv) The standards to be used in conducting the internal audits;
 - (v) The overall internal audit strategy of this subcontract, considering particularly the method of auditing costs incurred in the performance of the subcontract;
 - (vi) The intended use of external audit resources;
 - (vii) The plan for audit of lower-tier subcontracts, both pre-award and post-award; and
 - (viii) The schedule for peer review of internal audits by other Subcontractor internal audit organizations, or other independent third party audit entities approved by the NREL Subcontract Administrator.
 - (2) By each January 31 of the subcontract performance period, the Subcontractor must submit an annual audit report, providing a summary of the audit activities undertaken during the previous fiscal year. That report shall reflect the results of the internal audits during the previous fiscal year and the actions to be taken to resolve weaknesses identified in the Subcontractor's system of business, financial, or management controls.
 - (3) By each June 30 of the subcontract performance period, the Subcontractor must submit to the NREL Subcontract Administrator an annual audit plan for the activities to be undertaken by the internal audit organization during the

next fiscal year that is designed to test the costs incurred and Subcontractor management systems described in the internal audit design.

- (4) The NREL Subcontract Administrator may require revisions to documents submitted under paragraphs (i)(1), (i)(2), and (i)(3) of this clause, including the design plan for the internal audits, the annual report, and the annual internal audits.
- (j) Remedies. If at any time during subcontract performance, the NREL Subcontract Administrator determines that unallowable costs were claimed by the Subcontractor to the extent of making the Subcontractor's management controls suspect, or the Subcontractor's management systems that validate costs incurred and claimed suspect, the NREL Subcontract Administrator may, in his or her sole discretion, require the Subcontractor to cease using the special financial institution account in whole or with regard to specified accounts, requiring reimbursable costs to be claimed by periodic vouchering. In addition, the NREL Subcontract Administrator, where he or she deems it appropriate, may: Impose a penalty under 48 CFR 970.5242-1, Penalties for Unallowable Costs; require a refund; reduce the Subcontractor's otherwise earned fee; and take such other action as authorized in law, regulation, or this subcontract.

Alternate I (DEC 2000). As prescribed in 970.3270(a)(2), if the subcontract includes the clause at 48 CFR 52.215-11, Price Reduction for Defective Cost or Pricing Data—Modifications, the basic clause shall be modified as follows:

- (a) Paragraph (a) of the basic clause shall be modified by adding the words “or anticipated to be incurred” after the words “allowable costs incurred.”
- (g) Paragraph (g) of the basic clause shall be modified by adding the following: The Subcontractor further agrees to include an “Audit” clause, the substance of which is the “Audit” clause set forth at 48 CFR 52.215-2, in each lower-tier subcontract which does not include provisions similar to those in paragraph (a) through paragraph (g) and paragraph (h) of this clause, but which contains a “defective cost or pricing data” clause.

Derived from DEAR 970.5242-1 (AUG 2009)

Applies to cost type subcontracts.

- (a) Subcontractors which include unallowable cost in a submission for settlement for cost incurred, may be subject to penalties.
- (b) If, during the review of a submission for settlement of cost incurred, the DOE Contracting Officer, through NREL, determines that the submission contains an expressly unallowable cost or a cost determined to be unallowable prior to the submission, the DOE Contracting Officer shall assess a penalty, through NREL.
- (c) Unallowable costs are either expressly unallowable or determined unallowable.
 - (1) An expressly unallowable cost is a particular item or type of cost which, under the express provisions of an applicable law, regulation, or this subcontract, is specifically named and stated to be unallowable.
 - (2) A cost determined unallowable is one which, for that Subcontractor—
 - (ii) Was subject to a DOE Contracting Officer's final decision and not appealed;
 - (iii) The Civilian Board of Contract Appeals or a court has previously ruled as unallowable; or
 - (iv) Was mutually agreed to be unallowable.
- (d) If the DOE Contracting Officer determines that a cost submitted by the Subcontractor in its submission for settlement of cost incurred is—
 - (1) Expressly unallowable, then the DOE Contracting Officer shall assess, through NREL, a penalty in an amount equal to the disallowed cost allocated to this subcontract plus interest on the paid portion of the disallowed cost. Interest, through NREL, shall be computed from the date of overpayment to the date of repayment using the interest rate specified by the Secretary of the Treasury pursuant to Pub. L. 92-41 (85 Stat. 97); or
 - (2) Determined unallowable, then the DOE Contracting Officer shall assess, through NREL, a penalty in an amount equal to two times the amount of the disallowed cost allocated to this subcontract.
- (e) The DOE Contracting Officer may waive the penalty provisions when—
 - (1) The Subcontractor withdraws the submission before the formal initiation of an audit of the submission and submits a revised submission;
 - (2) The amount of the unallowable costs allocated to covered subcontracts is \$10,000 or less; or
 - (3) The Subcontractor demonstrates to the DOE Contracting Officer's satisfaction that—
 - (ii) It has established appropriate policies, personnel training, and an internal control and review system that provides assurances that unallowable costs subject to penalties are precluded from the Subcontractor's submission for settlement of costs; and
 - (iii) The unallowable costs subject to the penalty were inadvertently incorporated into the submission.

An imposition of a civil penalty does not prevent the Government from seeking any other remedy that may be applicable.
- (2) Subcontractors or lower-tier Subcontractors may rely without liability on the representation made by their lower-tier Subcontractors in the certification and disclosure form.
- (f) Cost allowability. Nothing in this clause makes allowable or reasonable any costs which would otherwise be unallowable or unreasonable. Conversely, costs made specifically unallowable by the requirements in this clause will not be made allowable under any other provision.
- (g) Lower-tier Subcontracts.
- (1) The Subcontractor shall obtain a declaration, including the certification and disclosure in paragraphs (c) and (d) of the provision at FAR 52.203-11, Certification and Disclosure Regarding Payments to Influence Certain Federal Transactions, from each person requesting or receiving a subcontract, at any-tier, exceeding \$150,000 under this subcontract. Any security system the Subcontractor may elect to use (fences, keys, alarms, etc.) must be coordinated with the NREL Technical Monitor.
 - (4) The Subcontractor is responsible to advise the NREL Technical Monitor promptly of any non-routine events, occurrences, incidents, accidents, etc., particularly in situations involving lost-time accidents and ambulance runs, occurring under this subcontract.

Any such repository shall (i) encrypt data in transmission and at rest, (ii) allow NREL to administer access to the repository to those NREL individuals with a business need to access, and (iii) be restricted (via access control mechanisms) to only those Subcontractors who are participating in the Work. Subcontractor-based sharing repositories must be based in the United States.
- (7) Privacy. Upon NREL's request, the Subcontractor shall provide NREL with a copy of its Privacy Notice, Privacy Policy, and related documents pertaining to privacy governance.

NREL Data includes, without limitation: (i) information on paper or other non-electronic media provided to Subcontractor and lower tier subcontractors for computer processing or storage, or information formerly on electronic media; (ii) information provided to the Subcontractor by NREL customers, users, employees, or other third parties; and (iii) Sensitive NREL Data as that term is defined below. For the sake of clarification, "NREL Data" and "Sensitive NREL Data" shall not be considered "Data" or "Technical Data" generated under this subcontract as defined in and governed by the Intellectual Property provisions in Appendix C of this subcontract.
- (2) "Sensitive NREL Data" means data that poses a risk to NREL, its employees, customers, partners, and the public if improperly disclosed or accessed, including without limitation personally identifiable information, financial information, protected health information, proprietary information, critical infrastructure information, information officially designated as sensitive (Controlled Unclassified Information, Official Use Only information), information that is proprietary by nature such as access codes or passwords, and other proprietary information as identified by NREL within the Agreement. For the sake of clarification, "NREL Data" and "Sensitive NREL Data" shall not be considered "Data" or "Technical Data" generated under this subcontract as defined in and governed by the Intellectual Property provisions in Appendix C of this subcontract.
- (3) "System" means any on premises, hosted, or cloud-based business information or a critical infrastructure system that is designed and installed by the Subcontractor or necessary for the proper operation of applications and infrastructure designed and installed by the Subcontractor. The system scope includes but is not specifically limited to applications, databases, supporting infrastructure (network devices; endpoint servers, workstations, mobile devices, or special appliances and their respective firmware, operating systems, and middleware), contracted or NREL partner services, and all related configuration and interconnections that are required for proper operation of the system.

(b) Data Protection Requirements

- (1) Subcontractor's Access and Use of NREL Data. Subject to Section 4 below, unless it receives NREL's prior written consent, Subcontractor shall not: (i) access, process, or otherwise use NREL Data other than as necessary to facilitate the work under this Agreement; (ii) give any employee access to NREL Data except to the extent that such individual needs access to facilitate performance under this Agreement; (iii) give any third party access to NREL Data, including without limitation Subcontractor's other customers, except Subcontractor's authorized lower tier Subcontractors as required to fulfill the Statement of Work; and (iv) sell or transfer NREL Data to any third party. Notwithstanding the foregoing, Subcontractor may disclose NREL Data as required by applicable law or by proper legal or governmental authority. Subcontractor shall give NREL prompt notice of any such legal or governmental demand and shall cooperate with NREL in any effort to seek a protective order or otherwise to contest such required disclosure, at NREL's expense.

in and to NREL Data, and Subcontractor's use and possession thereof is solely on NREL's behalf. Upon NREL's request, NREL may access and copy any NREL Data in Subcontractor's possession at any time, at no cost to NREL. Subcontractor shall facilitate such access after receiving NREL's request.
- (3) Retention and Deletion of Data. Subcontractor shall follow any commercially reasonable written instructions from NREL regarding retention and erasure of NREL Data; provided, however, Subcontractor shall not retain any NREL Data beyond thirty (30) days after termination of this Agreement unless otherwise requested and approved in writing in advance by NREL. NREL Data shall be available to NREL to retrieve at any time and at no additional charge throughout the term of this Agreement and for no more than thirty (30) days after expiration or termination of this Agreement for any reason. Promptly after erasure of NREL Data or any copy thereof, Subcontractor shall certify such erasure to NREL in writing. In purging or erasing NREL Data as required by this Agreement, Subcontractor shall leave no data recoverable on its computers or other media, to the maximum extent technically feasible.
- (4) Applicable Law. Subject to applicable intellectual property requirements incorporated into the Agreement, the Subcontractor shall comply with all applicable laws and regulations governing the handling of NREL Data and shall not engage in any activity related to NREL Data that would place NREL in violation of any applicable law, regulation, government request, or judicial process.
- (5) Data Breach. Subcontractor shall use industry-standard best practices to prevent unauthorized exposure or disclosure of NREL Data. In the event of a confirmed data breach or unauthorized disclosure, Subcontractor shall (i) notify NREL by telephone within 72 hours of discovery of the breach or unauthorized disclosure; and (ii) cooperate with NREL, Department of Energy, and law enforcement agencies, where applicable, to investigate and resolve the matter, including without limitation notifying injured third parties. Subcontractor shall give NREL prompt access to such records related to a data breach or unauthorized disclosure as NREL may reasonably request, provided that Subcontractor shall not be required to provide NREL with records belonging to, or compromising the security of, Subcontractor's other customers. In the event of a confirmed data breach or unauthorized disclosure caused solely by the negligent act or omission or willful misconduct of the Subcontractor or any of its agents, employees, or lower tier subcontractors, to the extent permitted by applicable law and Subcontractor policies, the Subcontractor shall be responsible for any costs related to the data breach or unauthorized disclosure to be identified and agreed upon by Subcontractor, NREL and DOE, as necessary. Such costs may include: (i) notification to all affected individuals using a reasonable method (e.g., email or standard regular mail; overnight courier is not reasonable); (ii) one year of credit monitoring for all affected individuals; and (iii) any other penalties and fines related to the breach or unauthorized disclosure as required by applicable law. The provisions of this Agreement do not limit NREL's other rights and remedies, if any, resulting from a data breach or unauthorized disclosure.
- (6) Information Sharing. Subcontractor shall provide a secure repository for the exchange of data related to this project, or at NREL's option, use a secure repository provided by NREL for this purpose. Any such repository shall (i) encrypt data in transmission and at rest, (ii) allow NREL to administer access to the repository to those NREL individuals with a business need to access, and (iii) be restricted (via access control mechanisms) to only those Affiliates who are participating in the Work. Subcontractor-based sharing repositories must be based in the United States.
- (7) Privacy. Upon NREL's request, the Subcontractor shall provide NREL with a copy of its Privacy Notice, Privacy Policy, and related documents pertaining to privacy governance.

- (8) Backup and Recovery. Subcontractor shall ensure the recoverability of NREL Data lost due to operator error, system error or other unforeseen circumstances. In such event that NREL Data is lost as a result of Subcontractor-managed system failure or Subcontractor error, Subcontractor shall recover NREL's data at no charge to NREL.
- (9) Multi-Tenancy. Should NREL Data be processed or stored in a multi-tenant environment, security controls shall be in place to ensure that a tenant with weak security settings cannot affect or interfere with the security of NREL Data as well as to ensure that data is not co-mingled within servers or stacks.
- (10) Restrictions on Sensitive NREL Data. Subcontractor agrees to treat all Sensitive NREL Data disclosed to Subcontractor by NREL, whether such original disclosure is written or oral as confidential and proprietary, and not to disclose Sensitive NREL Data to any third party for a period of five (5) years from date this Agreement expires or is terminated, whichever occurs first. However, oral disclosure of information (i.e., information expressed by spoken words) by NREL to Subcontractor shall be considered Sensitive NREL Data upon being identified as such at the time of disclosure and reduced to writing and a copy thereof being provided by NREL to Subcontractor within thirty (30) days of such disclosure. Upon expiration or termination of the Agreement, Subcontractor shall certify in writing that all copies and partial copies of such Sensitive NREL Data have either been returned or destroyed.

- (b) Commercial Product Requirements
- (1) Minimum Viable Use. Unless otherwise specified in the Statement of Work, the Product(s) shall have a minimum viable use of three years from the date of purchase. Products that are end of life or scheduled for sunset within three years of the date of purchase are ineligible for use under the Subcontract. Should the Product purchase be part of an overarching service contract that includes the ongoing purchase, installation, and maintenance of commercially available

Standard Terms and Conditions for Technical Services Including:

- (1) Labor Hour, (2) Labor Hour and Expenses, and (3) Consultant Agreements
(where the Service Contract Act does NOT apply)
equipment over a fixed term, purchased Products must be replaced by Subcontractor when they reach their end of life status.
- (2) Responsible Sourcing. Products (i) with Department of Homeland Security directives against purchase, (ii) prohibited by the National Defense Authorization Act, or (iii) sold or manufactured by companies on the Department of Labor Office of Federal Contract Compliance Programs Debarred Companies list are ineligible for use under the Subcontract. Such ineligible products include, but are not limited to, Products containing components manufactured by debarred companies, and Products manufactured in countries on the DOE Sensitive Countries List. Subcontractor must submit a request for authorization to NREL Technical Monitor if Subcontractor intends to use a Product manufactured in a country other than the United States. NREL Technical Monitor shall deny any such requests if the subject country of manufacture appears on the DOE Sensitive Countries List. If the subject country of manufacture does not appear on the DOE Sensitive Countries List, NREL Technical Monitor may approve or deny any such request in NREL Technical Monitor's sole discretion.
- (3) Logging. The Product(s) must support or facilitate logging and forwarding of application security events for operational failure, security incident, and security monitoring purposes.
- (4) Access Control and Authority. The Product must be able to operate with user level authority and must not require that a user be logged in as an administrator to operate properly. Product(s) that are intended for use by more than one individual must contain features that allow administrators to control user and system access to functions, features, or system components on a need-to-know basis, and, to the extent practicable, role-based and with the option to integrate with existing Single Sign On / multi-factor authentication systems. Users and administrators of the Product must be able to change and otherwise manage their credentials (including, but not limited to, the capability to establish a password and perform password resets).
- (5) Compatibility with Security Functions and Products. The Product(s) must be capable of operating concurrently with standard industry security products, such as antimalware programs, log collection and monitoring agents, and web application firewalls. The Product must tolerate periodic vulnerability scanning, operating system patching and upgrades, and basic system hardening (for example, changing of default passwords and disabling unnecessary services). Products that require an out-of-support operating system or do not tolerate operating system patching for at least three years from the date of purchase will be considered out of compliance with the Minimum Viable Use requirement.
- (6) Data Security. Products that are intended for the storage, processing, or transfer of sensitive NREL Data must support strong encryption at rest using an unbroken encryption algorithm, and that is FIPS 140-2 compliant to the extent practicable. Products that communicate over the Internet for authentication, maintenance purposes, or remote management, must facilitate encryption in transit using an unbroken encryption algorithm. Products that store sensitive data must tolerate and/or enforce purging data for which NREL determines it longer has a business need to retain.
- (7) Proof of Concept. Proof of concept systems and environments must be physically and logically separate from NREL production systems and must not require the use of any NREL production data.
- (8) Special Purpose Equipment. Should the Product(s) require the installation of proprietary hardware, software, or a hardware/software combination for management, maintenance, or use, either (a) NREL must have administrative access to the management system and permission to manage its settings in order to apply and verify NREL's required security controls, or (b) the system must be separated from the NREL internal network using, at a minimum, logical access

 in as an administrator to operate properly. Access control functions facilitated across a network must be configured to validate all users' identities before access can be established or changed (e.g., by sending an expiring token to the user through a separate channel). Users and administrators of the Product must be able to self-manage their credentials (e.g., by establishing a password and performing password resets).
- (iii) Compatibility with Security Functions and Products. The Product must be capable of operating concurrent with customary industry security products, including but not limited to antimalware programs, log collection and monitoring agents, and web application firewalls. The Product must be able to run on a manufacturer-supported operating system and tolerate periodic vulnerability scanning, operating system patching and upgrades, and basic system hardening (for example, changing of default passwords and disabling unnecessary services).
- (iv) Data Security. Products that are intended for the storage, processing, or transfer of sensitive data must facilitate encryption at rest using an unbroken encryption algorithm, and that is FIPS 140-2 compliant to the extent practicable. Products that communicate over the Internet, for example, for authentication, maintenance purposes, or remote management, must facilitate encryption in transit using an unbroken encryption algorithm. Products that store sensitive data must tolerate and/or enforce purging data that NREL determines no longer has a business need to be retained.
- (v) Back Doors and Covert Features. Covert software features such as backdoors are incompatible with NREL's business practices and are prohibited.
- (2) Test and Development Environments. Test and development software environments and production software environments must be kept strictly separate through physically separate computer systems or separate directories or libraries with strictly enforced access controls.
- (3) Open Source and Third-Party Components. All open source and external software packages and versions used within the application must be approved by NREL's designated Information System Security Officer. These include but are not limited to open-source application versions, linked libraries, database applications, and encryption packages. Subcontractors shall provide proof of license for all licensed software, software components, and third-party libraries used within the application. The use of public domain, shareware, or freeware software not specified in the Statement of Work is subject to NREL's review and written approval.
- (4) Test Data. Subcontractors may never use production data to perform testing of applications that are designed to collect, process, store, or transmit sensitive data. Test data sets may be fabricated or may be produced from sanitized production data. Subcontractor must ensure that the sanitization process has completely removed and/or replaced all details that may be valuable, critical, sensitive, or private before sanitized production data is used for testing.
- (5) Security Testing. At NREL's discretion, Subcontractor must conduct, or permit NREL to conduct, initial vulnerability analysis and penetration testing prior to the release of the application. Should the Subcontractor not have a relationship or resources to perform such testing, or should such testing be excluded from the Scope of Work, the Subcontractor must cooperate with NREL and NREL's agents (if applicable) to facilitate and perform security testing prior to launch of any custom application.
- (6) Vulnerability Remediation. Subcontractor must support the remediation of known exploitable security vulnerabilities or vulnerabilities discovered in the application by the Subcontractor, NREL, or an external party during security testing, security

incident reporting, or in the normal course of operations for the duration of the project. Critical or high-risk exploitable vulnerabilities (categorized by the Common Vulnerability Scoring System) for which a patch is available must be repaired and re-tested to confirm repair within thirty (30) days of when the vulnerability is first reported to the Subcontractor. The Subcontractor must provide a Plan of Actions and Milestones to repair medium or lower-rated vulnerabilities on a timetable established by NREL, but in no event greater than 180 days from the date the vulnerability was reported to the Subcontractor or identified by NREL. Repair plans may consist of a custom code adjustment (version), patch, or upgrade.

- (7) Source Code Management. Source code that facilitates transactions with Sensitive NREL Data or related sensitive business functions may not be publicly released or published and must be access controlled. Public-facing non-compiled source code (including when used in web application programming) must be obfuscated to hide the business logic behind the application. Source code must otherwise be stored in an access-controlled code management repository to prevent unauthorized changes.

- (1) “System” or “information system” means any on premises, hosted, or cloud-based business information or critical infrastructure system that is designed and installed by the Subcontractor or necessary for the proper operation of applications and infrastructure designed and installed by the Subcontractor. The system scope includes but is not specifically limited to applications, databases, supporting infrastructure (network devices; endpoint servers, workstations, mobile devices, or special appliances and their respective firmware, operating systems, and middleware), contracted or NREL partner services, and all related configuration and interconnections that are required for proper operation of the system.
- (2) “Industrial Control System” (also referred to as “control system”) means a system of networks, computers, and appliances that function as a unit to provide essential services and commodities. This includes, but is not specifically limited to, technologies used on and within supervisory control and data acquisition (SCADA) systems, and other technology appliances that are used to program, send commands to, monitor, and acquire data from controllers, sensors, actuators, and related operational equipment.
- (3) “Information System Security Officer” means the security expert designated by NREL to assess and address cybersecurity risk to NREL and to oversee compliance with NREL’s security requirements.
- (4) “Production systems or data” means any computer system or data processed therein that is in regular operational use, the disruption, corruption, loss, or exposure of which would cause negative impact to NREL’s mission or business operations.

(b) System Design and Implementation Requirements

- (1) Security Design. Subcontractor shall incorporate NREL’s security recommendations into the system design. These recommendations shall be provided by NREL’s Information System Security Officer upon review of the proposed system design. Additional requirements for industrial control systems are specified under Industrial Control System Network Design and Architecture.
- (2) Industrial Control System Network Design and Architecture. Where required in the Statement of Work, the Subcontractor shall design and/or configure, as appropriate, physical architectures and/or logical security controls for control systems that (a) maintain boundary separation between the control system and the public Internet such that there is no direct connection to or from the control system and the public Internet, (b) maintain appropriate separation between the control system and the general internal network such that only those communications required for the system’s maintenance or operation are permitted and (c) segment the internals of the control system into security domains or enclaves by common level of trust, management responsibility, and security policy. Internal control system network security domains must include, at minimum, a safety zone and a control zone. The controls shall be designed and configured in accordance with the latest versions of NIST Special Publication 800-82: Guide to Industrial Control Systems (ICS) Security Section 5 and (or equivalent documents if superseded during the life of the Subcontract) for acceptable segmentation methods. Logical groupings of systems without access control (ex. open VLANs) are insufficient to satisfy this requirement.
- (3) Network Protocol. All system and network components will be IPV6 compliant to the extent possible while preserving system operation.
- (4) System Development. As required in the Statement of Work, Subcontractor shall maintain access control for the system throughout its development and installation in accordance with the principle of least privilege. Subcontractor shall not use

- (1) Labor Hour, (2) Labor Hour and Expenses, and (3) Consultant Agreements

(where the Service Contract Act does NOT apply)

shared or open administrative access during system development. Subcontractor shall not use any NREL production data in the test and development processes unless specifically authorized by NREL security officials.

- (5) Design Changes. Subcontractor shall communicate any necessary changes in the system design (as required in Requirement 1) to the NREL designated Information System Security Officer prior to implementation of the change. Design changes that follow Authorization of the system and affect the system composition, data flows, or security and privacy controls require approval of NREL's designated Information System Security Officer.

- (7) Logging and Monitoring. Subcontractor systems must facilitate capture (for example, activity logging) and where feasible, forwarding of recorded events for operational failure, security incidents, and security monitoring purposes. Where security logging and monitoring are the Subcontractor's responsibility under the Statement of Work or a customer responsibility matrix (see Customer Responsibility Matrix), the Subcontractor shall follow the provisions under Security Incident Reporting.
- (8) Security Incident Reporting. Subcontractor shall (i) notify NREL by telephone within 72 hours of confirmation of a cybersecurity incident that affects NREL contracted resources or the data contained therein (for example, but not limited to, a service interruption, loss, disclosure, or confirmed evidence of a suspicious or malicious presence); and (ii) cooperate with NREL and their delegates, where applicable, to investigate and resolve the matter, including without limitation providing access to logged evidence and other artifacts necessary to substantiate the security investigation.
- (9) SOC 2 Type 2 Report. No greater than fourteen calendar days after issuance of the Subcontract, Subcontractor shall provide to NREL its most recent Service Organization Control (SOC) 2 Type 2 report pertaining to the scope of services

provided to NREL. Thereafter for the term of this Subcontract, the Subcontractor shall provide updated SOC 2 Type 2 reports to NREL annually. If Subcontractor's SOC 2 Type 2 report is qualified, then Subcontractor will provide a written Plan of Actions and Milestones to notify NREL of what actions they are taking to correct any findings and the expected resolution date for those corrections. Should a SOC 2 Type 2 not be performed or available, an alternative third-party control audit report may be acceptable to NREL with prior notice, sufficiency of criteria review, and approval from NREL.
- (10) FedRAMP Compliance. Where the Services rendered by the Subcontractor are certified to the Moderate level under the FedRAMP program, and where they are continually maintained in compliance with the FedRAMP program, the Subcontractor is exempt from Requirement 8, SOC 2 Type 2 Report. Additional security assurance, in the form of a third-party report (ex. SOC 2 Type 2 report) to the extent practicable, must be provided for FedRAMP Low and FedRAMP In-Progress services.
- (11) Corrective Actions. If defects in security or compliance are reported in an annual report, Subcontractor shall provide NREL with a Plan of Actions and Milestones that details the actions and timeline to resolve such defects. Subcontractor shall resolve such security and compliance defects in the scope of the Subcontractor's supported services at no additional charge to NREL.
- (12) Notice of Change. Subcontractor shall notify NREL in writing of planned significant changes to the services or services platform no less than thirty (30) days prior to the planned change. Significant changes include, but are not limited to, the launch of a new feature, migration of services to a new data center, changes in system or data security and privacy controls, or major application or system version upgrades.
- (13) Notice of Outage. In the event of a planned service outage, Subcontractor shall notify NREL by telephone or in writing at least five (5) business days in advance of such outage. In the event of an unplanned service outage, Subcontractor shall notify NREL as soon as possible, and in any event within four (4) business hours.
- (14) Customer Responsibility Matrix. Subcontractor shall provide NREL with a written matrix of security and privacy functions that describes which security features the Subcontractor will configure and manage and which features NREL is responsible to configure and manage. Subcontractor shall provide an updated matrix as updates to the Statement of Work annually or as the provided services occur. For any security feature NREL is responsible to configure, Subcontractor shall provide the NREL Information System Security Officer and System Administrators with documentation of or ongoing access to clear and unambiguous written instructions for the configuration of such features, including without limitation a description of available access controls mechanisms and access roles.

**CYBERSECURITY: SUBCONTRACTOR NETWORK ACCESS AND SUBCONTRACTOR
EMPLOYEE CRIMINAL BACKGROUND CHECKS AND DRUG TESTING (DEC 2022)**

(This clause applies to all Subcontracts that require Subcontractor personnel to directly access NREL Internal Networks and related computing systems either at the NREL campus, or via remote link.)

(a) Definitions. As used in this clause—

- (1) “DOE Sensitive Countries List” means a confidential list of countries maintained by the U.S. Department of Energy to which particular consideration is given for policy reasons during NREL internal review and approval process for visits, assignments, and access by Foreign Nationals. Countries may appear on the list of national security, nuclear nonproliferation, or terrorism support reasons.
- (2) “Foreign National” means a person born outside the jurisdiction of the United States, is a citizen of a foreign government, and has not been naturalized under U.S. law.
- (3) “NREL Internal Networks” means any computers or computer networks that are hosted, maintained, and operated by NREL that are logically positioned interior to the NREL-managed network boundary (interior to an NREL firewall and not part of a defined Demilitarized Zone or DMZ) and require NREL-provided credentials to access. An example is a computer or computer network that requires the use of NREL-provided credentials on a local system or through a Virtual Private Networking or VPN. This definition does not include, and therefore this clause does not apply to, receipt or access to information from NREL through a managed external gateway (for example, an external-facing file-sharing platform, NREL website, an online collaboration tool, externally-allocated computer resources, or similar) with no direct access to NREL Internal Networks.
- (4) “NREL Facilities” means any NREL-maintained and operated location that is physically accessible, including but not limited to: offices, data centers, stations, communications closets or houses, maintenance facilities, sheds or outbuildings, utility conduits or utility access ports.
- (5) “NREL Technical Monitor” means the individual accountable for the stewardship of the Subcontractor’s technical project performance. NREL Technical Monitor is not authorized to direct to the Subcontractor binding modifications and changes to the Subcontractor’s technical project performance, including scope of work, schedule, budget, performance period, or terms and conditions under this Subcontract.
- (6) “Operationally Critical Devices” means computers or other appliances that are so important to the operation of NREL’s information systems that any disruption, tampering, corruption, or outage would cause severe impact to NREL’s ability to carry out its mission or business operations.
- (7) “Systems Management Devices” means computers or other appliances that are used to manage, monitor, or make changes to other computers that support an information system.
- (8) “NREL System Administrator” means an NREL employee who is in charge of the maintenance and security of an information system and has elevated rights and privileges to perform those duties.

(b) Network Access Requirements

- (1) NREL Security Policies and Procedures. In the event the Subcontractor’s personnel or lower tier subcontractors require access to NREL facilities or Networks, or related systems, whether physically or remotely, to provide installation, integration, interconnection, support, or other services, Subcontractor personnel will abide by NREL’s Acceptable Use Agreement. Subcontractor personnel shall attend subcontractor cybersecurity training that covers the requirements of this policy prior to access being granted and annually thereafter (as long as access persists).
- (2) Subcontractor Access Requests. Should Subcontractor access to NREL Facilities or NREL Networks be necessary to support the implementation or support of the services, Subcontractor shall provide to NREL’s designated Technical Monitor the

Standard Terms and Conditions for Technical Services Including:

- (1) Labor Hour, (2) Labor Hour and Expenses, and (3) Consultant Agreements
(where the Service Contract Act does NOT apply)
contact information for the individuals requiring access, the necessary level of access, the business justification for each access, and the duration for which access is required (if not equal to the termination date of the Subcontract). Subcontractor employees will not share passwords or accounts with one another or with lower tier subcontractors.
- (3) Access Limitations. Subcontractors will be provided with access only to facilities, systems, networks, and data necessary to perform the services. NREL shall determine the degree and methods of access necessary to support the scope of services per applicable internal security policies and procedures.
- (4) Work Locations. Subcontractor personnel shall not access or interact with NREL internal networks while physically located in, or using systems that are located in, a country on the DOE Sensitive Countries List. Subcontractor must submit a request for authorization to NREL Technical Monitor if any Subcontractor personnel intends to access or interact with NREL internal networks while physically located in, or using systems that are located in, a country other than the United States. NREL Technical Monitor shall deny any such requests if the subject country appears on the DOE Sensitive Countries List. If the subject country does not appear on the DOE Sensitive Countries List, NREL Technical Monitor may approve or deny any such request in NREL Technical Monitor's sole discretion.
- (5) Access Termination. Subcontractor must notify NREL Technical Monitor immediately upon actual or anticipated departure or change in job role for Subcontractor personnel with access to the NREL network.
- (6) Privileged Access to Operationally Critical or Systems Management Devices. Subcontractors requiring direct, privileged access to operationally critical systems to perform the Statement of Work must additionally comply with Homeland Security Presidential Directive 12 (HSPD-12), Personal Identity Verification (PIV), a process facilitated by NREL and administered by the Department of Energy. This entails providing additional personnel background forms and information. If Subcontractor may have a privileged systems administration role, Subcontractor must identify relevant personnel to the NREL Technical Monitor and start the HSPD-12/PIV process as soon as possible upon endorsement of the Agreement, and no later than one month in advance of anticipated start of system management and implementation work.
- (7) Maintenance Services. Subcontractors requiring infrequent local (access at NREL Facilities) or remote access to NREL-hosted equipment for periodic maintenance shall be accompanied and monitored by an NREL System Administrator for the duration of the maintenance activity. Subcontractor access to the equipment will be provided upon expressed need and rescinded when not in use. Unless such is specifically required in the Statement of Work, and the system to be maintained has been designed and authorized by NREL for such purposes, Subcontractors may not install remote maintenance software or system back doors to perform continuous maintenance without NREL personnel in attendance.
- (c) Subcontractor Employee Criminal Background Checks and Drug Testing
- (1) Upon identification of an individual proposed to work under this Subcontract, the Subcontractor shall perform or obtain a background check on such individual before assigning the individual to the Subcontract. At a minimum, the background check shall include each of the following:
- (i) Criminal background check for the past seven years in Colorado state criminal system
 - (ii) Criminal background check for the past seven years in other counties in which the individual has lived outside the state of Colorado
 - (iii) Criminal background check for the past seven years in federal criminal system
 - (iv) Drug Testing (Basic 5 Panel Screen)
 - (v) Department of Motor Vehicle History (only if driving is required for the

- (2) The Subcontractor shall conduct a thorough review of the background check results.
 - (i) When adverse finding(s) are identified, the Subcontractor shall evaluate and assess the type, surrounding circumstances, and date of occurrence(s) of the adverse finding(s) relative to the scope of the NREL assignment.
 - (ii) Based on the background check results, the Subcontractor shall determine whether or not the individual presents a risk to NREL if granted access to NREL Networks, Operationally Critical Devices, and/or Systems Management Devices necessary to perform work under this subcontract.
 - (iii) Under no circumstances shall the Subcontractor disclose the results of a background check or the type, surrounding circumstances, and date of occurrence(s) of any adverse findings to the NREL Subcontract Administrator or any other NREL employee.
- (3) The Subcontractor shall ensure that the Subcontractor's personnel assigned to NREL:
 - (i) Satisfy all NREL access security requirements. Subcontractor personnel who are Foreign Nationals will be subject to additional access requirements and processing time regardless of any such individual's work location. The access requirements set forth in NREL Terms and Conditions, Security and Access Requirements clause shall apply to requests for access to NREL Facilities and NREL Internal Networks.
 - (ii) Satisfactorily complete all required NREL Safety Orientation and Safety Training.
- (4) In the event that the Subcontractor fails to satisfy or complete the requirements set forth in this Clause, NREL reserves the right to cancel any assignment and/or request the immediate removal of the Subcontractor's personnel from assignment to the subcontract by giving verbal or written notice (via facsimile, email, or letter mailed or otherwise delivered) to the Subcontractor.
- (5) Upon review of an individual's background check results and determination that the individual does not present a risk to NREL if granted access to NREL Networks, Operationally Critical Devices and/or Systems Management Devices necessary to perform work under this subcontract, the Subcontractor shall provide, via email to the Subcontract Administrator, the individual's name and the following certification: "A background check for the individual(s) listed below has been completed, reviewed, and analyzed in accordance with the terms of the subcontract. I hereby certify that the individual(s) listed below is authorized to perform work under NREL Subcontract No. _____."

CYBERSECURITY: CUSTODIANSHIP OF SENSITIVE NREL DATA (DEC 2022)

(This clause applies to all Subcontracts for the management of, access to, process of, or storage of NREL Data or Sensitive NREL Data, as defined below.)

- (a) Definitions. As used in this clause—
- (1) “NREL Data” means all information processed or stored on computers or other electronic media by NREL or on NREL’s behalf, or provided to Subcontractor for such processing or storage, as well as information derived from such information. NREL Data includes, without limitation: (i) information on paper or other non-electronic media provided to subcontractor, and lower tier subcontractors, hereinafter “Subcontractor(s),” for computer processing or storage, or information formerly on electronic media; (ii) information provided to Subcontractor by NREL customers, users, employees, or other third parties; and (iii) Sensitive NREL Data as that term is defined below. For the sake of clarification, “NREL Data” and “Sensitive NREL Data” shall not be considered “Data” or “Technical Data” generated under this subcontract as defined in and governed by the Intellectual Property provisions in Appendix C of this subcontract.
 - (2) “Sensitive NREL Data” means data that poses a risk to NREL, its employees, customers, partners, and the public if improperly disclosed or accessed, including without limitation personally identifiable information, financial information, protected health information, proprietary information, critical infrastructure information, information officially designated as sensitive (Controlled Unclassified Information, Official Use Only information), information that is proprietary by nature such as access codes or passwords, and other proprietary information as identified by NREL within the Subcontract. For the sake of clarification, “NREL Data” and “Sensitive NREL Data” shall not be considered “Data” or “Technical Data” generated under this subcontract as defined in and governed by the Intellectual Property provisions in Appendix C of this subcontract.
 - (3) “System” means any on premises, hosted, or cloud-based business information or a critical infrastructure system that is designed and installed by the Subcontractor or necessary for the proper operation of applications and infrastructure designed and installed by the Subcontractor. The system scope includes but is not specifically limited to applications, databases, supporting infrastructure (network devices; endpoint servers, workstations, mobile devices, or special appliances and their respective firmware, operating systems, and middleware), contracted or NREL partner services, and all related configuration and interconnections that are required for proper operation of the system.
- (b) Requirements for the Custodianship of Sensitive NREL Data
- (1) Scope. As applicable and necessary under the Statement of Work, NREL shall identify and / or approve (if generated or defined by the Subcontractor) what data may be created, collected, processed, transferred, or stored by the systems or processes supported by the Subcontractor such that it can be protected in accordance with the requirements below. No Sensitive NREL Data other than Sensitive NREL Data required to perform the Subcontractor’s services under the Statement of Work may be collected, processed, transferred, or stored.
 - (2) Access Control. Two-factor authentication shall be used for anyone who has access to proprietary and sensitive data from the Internet. Access shall be limited to only those individuals with a verified business need. Where feasible and applicable, role-based access control systems shall be implemented to enable user account administration by job role or function.
 - (3) Restrictions on Sensitive NREL Data. Subcontractor agrees to treat all Sensitive NREL Data disclosed to Subcontractor by NREL, whether such original disclosure is written or oral as confidential and proprietary, and not to disclose Sensitive NREL Data to any third party for a period of five (5) years from date this Subcontract expires or is terminated, whichever occurs first. However, oral disclosure of information (i.e., information expressed by spoken words) by NREL to

Standard Terms and Conditions for Technical Services Including:

(1) Labor Hour, (2) Labor Hour and Expenses, and (3) Consultant Agreements

(where the Service Contract Act does NOT apply)

Subcontractor shall be considered Sensitive NREL Data upon being identified as such at the time of disclosure and reduced to writing and a copy thereof being provided by NREL to Subcontractor within thirty (30) days of such disclosure. Upon expiration or termination of the subcontract, Subcontractor shall certify in writing that all copies and partial copies of such Sensitive NREL Data have either been returned or destroyed.

- (4) Logging. Where the Subcontractor stores, processes, and/or manages access to Sensitive NREL Data, the Subcontractor shall ensure that record and/or field level access controls are implemented on all databases containing Sensitive NREL Data and that security audit logging is implemented for all sensitive data accesses. The Subcontractor shall make security audit log data available to NREL for NREL's monitoring, or shall review log files daily for inappropriate access or suspicious access attempts and report any breach of security to NREL according to the clause titled CYBERSECURITY: GENERAL REQUIREMENTS.
- (5) Data Retention. No Sensitive NREL Data other than Sensitive NREL Data required to perform the Services and meet NREL's record retention requirements may be retained (whichever is more stringent). NREL shall communicate applicable data retention requirements to the customer prior to the collection of production data. Expired data shall be deleted from all managed systems and applications upon expiration, or within a commercially reasonable timeframe following the expiration date not to exceed thirty (30) days.
- (6) Sanitization. All Sensitive NREL Data on rewritable media shall be removed from systems by overwriting the media three times with ones and zeros before disposal or transfer of assets outside of NREL's use or the Subcontractor's custodianship. Read-only media must be degaussed or destroyed such that it is unrecoverable.
- (7) Encryption. Sensitive NREL Data stored in the system must be encrypted using an unbroken encryption algorithm, that is FIPS 140-2 compliant to the extent practicable. Sensitive data transmitted across the Internet to or by the system must be encrypted in transit using an unbroken encryption algorithm. Subcontractor must use encryption key management strategies that are designed to prevent the corruption or exposure of encryption keys or abuse by individuals without a business need.
- (8) Vulnerability Scanning. All systems that store, collect, transmit, or process Sensitive NREL Data that are accessible from the Internet shall undergo vulnerability scanning quarterly. All high-risk defects must be corrected with scans re-performed to demonstrate defects no longer exist.
- (9) Data Replication. Subcontractor shall not duplicate Sensitive NREL Data to other systems, including but not limited to test systems and databases, portable storage media, hardcopies, or other locations where it is not necessary for the business or technical function of the Subcontractor's services under the Statement of Work.
- (10) Security Assurance Reporting. For hosted or cloud systems used to collect, store, or process Sensitive NREL Data, practices used to maintain security of those Subcontractor-managed information systems in accordance with the above must be included in security reporting required in the clause titled CYBERSECURITY: CLOUD, HOSTED, OR OUTSOURCED SYSTEMS AND RELATED SERVICES.

CYBERSECURITY: CARDHOLDER DATA ENVIRONMENTS (AUG 2021)

(This clause applies to all Subcontracts for the design, installation, configuration, or maintenance of an information system, or part thereof, that collects, processes, transmits, or stores Cardholder Data, as defined below.)

- (a) Definitions. As used in this clause—
- (1) “Cardholder Data” or “CHD” means the full magnetic stripe contents of a credit card plus any of the following: cardholder name, expiration date, service code.
 - (2) “Cardholder Data Environment” or “CDE” means an area of a computer system or network that possesses cardholder data or sensitive authentication data (related to cards) and those systems that directly attach to such environments or otherwise support cardholder processing, storage, or transmission.
 - (3) “Sensitive Authentication Data” means security-related information including, but not limited to, card validation codes/values (e.g., three-digit or four-digit value printed on the front or back of a payment card, such as CVV2 and CVC2 data), full magnetic-stripe data, PINs, and PIN blocks) used to authenticate cardholders and/or authorize payment card transactions.
 - (4) “System” or “information system” means any on premises, hosted, or cloud-based business information or a critical infrastructure system that is designed and installed by the Subcontractor or necessary for the proper operation of applications and infrastructure designed and installed by the Subcontractor. The system scope includes but is not specifically limited to applications, databases, supporting infrastructure (network devices; endpoint servers, workstations, mobile devices, or special appliances and their respective firmware, operating systems, and middleware), underlying services, and all related configuration and interconnections that are required for proper operation of the system.
 - (5) “Plan of Actions and Milestones” means a schedule of activities that will be or are being undertaken to resolve a security weakness or control deficiency.
- (b) Cardholder Data Environments Requirements
- (1) PCI-DSS Compliance. Cardholder Data Environments shall comply with all requirements of the current effective version of the Payment Card Industry Data Security Standard (PCI-DSS) for Level 2 merchants throughout the lifecycle of the environment.
 - (2) Scope. As applicable and necessary under the Statement of Work, NREL shall disclose to the Subcontractor where cardholder data is stored in the target architecture such that it can be protected per the requirements below.
 - (3) CDE Boundary Controls. To limit the scope of PCI controls, Subcontractor shall separate systems that collect, store, process, or transmit cardholder data by using network security control methods that are (a) deemed sufficient under the PCI-DSS standard and (b) validated for sufficiency to the frequency required in the PCI-DSS.
 - (4) Multi-Tenancy. It is preferred that CDEs be separated by function and by customer. Should any of the CDEs be combined (across NREL, or across NREL and multiple customers, ex. multi-tenancy), in accordance with the PCI-DSS, Subcontractor shall implement and maintain access controls to adequately separate the functions of each environment such that actions taken in or for one CDE do not affect the security of other CDEs on the same architecture.
 - (5) Supporting Systems Compliance. Subcontractor shall maintain all systems that do not contain cardholder data but provide supporting services to those systems that do (for example, to provide support, reporting functions, or similar) in a manner consistent with PCI-DSS requirements.
 - (6) Control Responsibilities. Subcontractor shall participate with NREL in developing and reviewing a compliance scope matrix to document responsibility for the design and execution of PCI-compliant controls.
 - (7) Payment Applications. Subcontractor shall only offer and deploy Payment Application Data Security Standard (PA-DSS) or PCI Software Security Framework (when superseded in 2022) compliant products to NREL. Subcontractor shall

Standard Terms and Conditions for Technical Services Including:

- (1) Labor Hour, (2) Labor Hour and Expenses, and (3) Consultant Agreements

(where the Service Contract Act does NOT apply)

ensure all Subcontractor-managed applications and their underlying support systems (for example, underlying operating systems) are patched and upgraded to maintain PA-DSS certification and / or framework compliance throughout the life of the Subcontract. Subcontractor shall provide a PA-DSS Implementation Guide (written document or website) to accompany their product that instructs NREL in applying the appropriate network configuration and system settings to achieve PCI-DSS compliance. NREL will not accept custom programming or one-off payment solutions that are not PA-DSS certified or framework compliant.

- (8) Attestation of Compliance. Subcontractor shall provide to NREL annually or earlier upon request, an Attestation of PCI-DSS Compliance signed by a qualified or internal security assessor (QSA or ISA) as validation of the controls under vendor's scope.
- (9) Compliance Auditing. Subcontractor shall permit NREL to test, inspect, or audit Subcontractor systems assigned to NREL or data residing on Subcontractor hosted systems to support NREL's compliance responsibilities.
- (10) Corrective Actions. Should defects in security or PCI compliance be reported in an Attestation of Compliance or disclosed in another security report, Subcontractor shall provide a Plan of Actions and Milestones that details the actions and timeline to resolve. Subcontractor shall resolve security and compliance defects in scope of the Subcontractor's supported services at no additional charge to NREL.
