

Carbon Policy in the Transportation Sector

Energy Analysis Forum 2007 – Session 3
Moderator: Elizabeth Brown, NREL

U.S. Carbon Emissions by Sector

EIA 2005

Session Questions

- What impact can non-technology solutions have in achieving the goals of carbon policies?
- What is the role of EE and RE transportation technologies in meeting carbon reduction goals?
- What policy mechanisms for carbon reduction impact EE/RE transportation technology development? What information is missing from understanding these policy impacts?
- What are the possible carbon impacts of policy interaction?
- What is the impact of different liquid fuel production pathways on carbon emissions?
- What policy mechanisms have the largest carbon impact on liquid fuels production and delivery?

Speakers

“Win-Win Emissions Reduction Strategies”

Todd Litman, Victoria Transportation Policy Institute

“California’s Low-Carbon Fuel Standard”

Marc Melaina, NREL

“Impacts of Policy Mechanisms for Fuels and Agriculture Sectors”

John Sheehan, LiveFuels Inc.
