

Carbon Policy in the Electric Sector

Energy Analysis Forum 2007 – Session 2
Moderator: Lori Bird, NREL

Session Questions

- What are the implications of carbon regulation for renewable energy (RE) and energy efficiency (EE) technologies, particularly in the electric sector?
- What is the potential role of these technologies in meeting carbon reduction goals?
- What does carbon regulation imply for market development of EE/RE technologies?
- What lessons can we learn from air quality regulation, existing regional or international carbon policies, or carbon program implementation that can help shape future carbon policy?

Speakers

“The Regional Greenhouse Gas Initiative (RGGI) Analytical Experience”

Karl Michael, NYSERDA

“Load-Based Caps and Carbon Policy Design”

Rich Cowart, Regulatory Assistance Project

“Utility Regulator’s Perspective on Carbon Policy”

Ron Binz, Colorado PUC
