

Solar Heated Pools

For Your Home

Solar Heated Pools

All across America, using the power of the sun is the best way to create the perfect swimming pool temperature. It is comfortable, economical and ideal for the environment.

ARIZONA's sunshine supplies all the energy needed to heat this swimming pool. Solar pool heating systems are both non-polluting and attractive.

Solar Heated Swimming Pools

The Right Choice for Your Family

“The pool was so warm at the end of September we had steam rising from it one evening!”

— Mary Holland,
homeowner, Maryland

When solar pool heating systems are used in cooler climates, families can enjoy a longer swimming season.

A rooftop solar system installed on this **OREGON** home significantly reduces energy costs and provides the heat needed to keep this pool a comfortable temperature.

Solar Heated Pools

Comfortable

Comfortable.

Install solar heating for your pool, enjoy the perfect water temperature, and lengthen your swimming season.

Economical

Economical.

Heat your pool with the free and renewable energy from the sun. It is one of the most economical forms of energy available today and a wise choice for you. Your power pump and the power of the sun are all the energy you need.

Reliable

Reliable.

Enjoy your nearly maintenance-free solar system. Many manufacturers offer 10- to 15-year warranties.

Clean & Safe

Clean & Safe.

Make the right choice for your family. Solar heated pool systems produce clean, non-polluting energy. They are safe for our environment, safe for plants and animals and safe for all of us.
