

Federal Fleet Files

Vol. 2, No. 13 – December 2010

Highlighting the latest news and developments affecting Federal fleets.

Latest EPA Act 2005 Section 701 Waivers Now Available on the AFDC and TransAtlas Web Sites

To facilitate public consumption and analysis of waived alternative fuel vehicle data, the locations of the most recent Energy Policy Act (EPA Act) of 2005 Section 701 waived vehicles are now posted online. The U.S. Department of Energy (DOE) Alternative Fuels and Advanced Vehicles Data Center (AFDC) offers tabular data based on waiver approvals for 2011 (submitted in June 2010). Data can be downloaded from www.afdc.energy.gov/afdc/data/fleets.html, saved, and analyzed for individual research.

In addition to tabular data, waiver data can also be viewed in TransAtlas, an interactive map that users can customize to display, query, download, and print underlying data. Additional data fields in this tool include:

- Existing and planned alternative fueling stations
- Alternative fuel production facilities
- Light-duty vehicle density among the general public
- Roads and political boundaries.

TransAtlas is part of a suite of geographic analysis tools for renewable energy developed at the National Renewable Energy Laboratory (NREL) and can be found at <http://maps.nrel.gov/transatlas>.

FAST Data Call Closes December 15, 2010

The Federal Automotive Statistical Tool (FAST) fiscal year (FY) 2010 data call will close on Wednesday, December 15, 2010. There are no plans for extending that date or re-opening the FAST FY 2010 data call. This means that by midnight on December 15, your agency's data entry, review, approval, and validation for the FAST portions of the data call must be complete.

As is the case every year, each agency is expected to provide user support and "help desk" resources for any users supporting their agency's submittal and review of the required data. This is particularly important during this final push to complete the data call. When system problems are encountered, or questions arise that you cannot answer, please contact Michelle Kirby by on the FAST Web team at michelle.kirby@inl.gov or 208-526-4273.

Transportation Rotation at FEMP

FEMP is seeking a candidate—such as a Presidential Management Fellow (PMF) or American Association for the Advancement of Science (AAAS) fellow—who is eligible for a detail assignment to support Federal transportation and fleet activities. The candidate will work on a small team, interacting with senior agency officials and fleet managers from across the Federal Government to identify and pursue opportunities for reducing petroleum use. This position is open to any full-time equivalent Federal employee, including a current PMF or AAAS fellow who is eligible for a detail assignment. Additional information can be found at www.pmf.opm.gov/RotationsDetail.aspx?num=3209, or by contacting Amanda Sahl at DOE at amanda.sahl@ee.doe.gov or 202-586-1662.

Electric Vehicle Quarterly Discussion Webinar

DOE's Clean Cities Program will host a Webinar about community deployment of electric vehicles on Wednesday, December 15, 2010. The Webinar will focus on differences in electric vehicle charging levels, charging options, characteristics of different technologies, and partnerships with electric utilities. For more information, contact Sandra Loi at sandra.loi@nrel.gov.

Greenhouse Gas Concentrations

FEMP offers three types of training that can help in understanding the processes needed to develop an agency's greenhouse gas (GHG) inventory under E.O. 13514 Section 9. These trainings include online interactive courses, archived Webinar videos, and Microsoft PowerPoint files from training courses. Training materials can be accessed at www.fedcenter.gov/programs/greenhouse/inventoryreporting/training/.

FedFleet 2011 Registration Is Open

FedFleet 2011, a one-stop Federal fleet conference, offers comprehensive sessions that cover an array of important topics such as fleet management, automotive procurement, aviation, and marine educational sessions. The large exhibit hall introduces attendees to the latest technologies and services available. Visit www.fedfleet.org for more information.

Alternative Fuel Finder

NREL maintains a database of alternative fueling stations nationwide through the AFDC. The table below shows new alternative fueling stations added to the database since last publication. Unless otherwise noted, only open, publicly accessible stations are included. Electric charging stations are included to prepare agencies for incorporating electric vehicles into fleets. Check the AFDC Alternative Fueling Station Locator for up-to-date information: www.afdc.energy.gov/afdc/locator/stations/.
