

ADVANCED MANUFACTURING OFFICE

A part of the Advanced Manufacturing Partnership

Working with U.S. manufacturers to succeed in global markets.

The Advanced Manufacturing Office (AMO) fosters advanced manufacturing innovation, facilitates public and private partnerships, and drives rapid deployment of technologies to help manufacturers:

- Save energy and money
- Reduce environmental impacts
- Enhance workforce development
- Improve national energy security and competitiveness throughout the supply chain

Technology Innovation

AMO-sponsored research and development accelerates technology innovation to increase efficiency, adaptability, and manufacturing competitiveness.

- Innovative Manufacturing Initiative
- Manufacturing Demonstration Facilities
- Critical Materials Hub

Technology Deployment

AMO offers proven methods, technical expertise, and recognition to support continuous energy management in plants and within supply chains.

- Energy Management Resources
- Better Buildings, Better Plants
- Superior Energy Performance
