

# LEDS GLOBAL PARTNERSHIP IN ACTION

Advancing climate-resilient  
low emission development  
around the world

Many countries around the globe are designing and implementing low emission development strategies (LEDS). These LEDS seek to achieve social, economic, and environmental development goals while reducing long-term greenhouse gas (GHG) emissions and increasing resiliency to climate change impacts. The LEDS Global Partnership (LEDS GP) harnesses the collective knowledge and resources of more than 120 countries and international donor and technical organizations to strengthen climate-resilient low emission development efforts around the world.

## How the Partnership Works

The LEDS GP delivers support through three vibrant regional platforms—the Africa Climate and Development Society (ACD-Soc), Asia LEDS Partnership (ALP), and the Latin America and Caribbean (LAC) Regional Platform. Each regional platform defines common country priorities that focus the LEDS GP efforts on member-driven, high-impact needs.

Supporting the regional platforms are eleven technical working groups and affiliated programs providing technical support for implementation through four global work streams: planning, finance, analysis and tools, and sectors. A steering committee provides guidance and sets strategic direction for LEDS GP, and a global secretariat coordinates LEDS GP implementation, knowledge management, and outreach.

The LEDS GP open and collaborative operating approach allows members to leverage resources and enhance coordination of climate-resilient low emission development activities, tools, and resources to achieve common objectives.

# LEDS GLOBAL PARTNERSHIP: MAKING AN IMPACT

## Selected examples of LEDSGP accomplishments over the last two years:

- Global and regional workshops and trainings for more than 800 practitioners on LEDSGP planning, analysis, finance, and sectoral programs
- LEDSGP activity inventory and analysis of LEDSGP support trends
- Transportation and Development Impacts Assessment (DIA) toolkits and country assistance
- National Finance Strategies with Colombia, Peru, and Chile
- Remote expert assistance on LEDSGP with Chile, Colombia, Ivory Coast, Mauritius, and Senegal
- Application of DIA visual tool with Ghana, Kenya, and Montenegro.

## LEDS GP ADDS VALUE TO COUNTRY-LED LEDSGP ACTIVITIES

Promotes peer learning and knowledge sharing

Enhances coordination

Facilitates technical collaboration

Provides responsive advisory support and matchmaking

Enhances understanding and analysis of LEDSGP benefits

## JOIN US

The LEDSGP is open to all interested parties who agree to our operating principles. There are many ways to participate in the LEDSGP Global Partnership. Become a member. Attend an event. Subscribe to our newsletters. Or share LEDSGP resources. To learn how, please visit [ledsgp.org/join](http://ledsgp.org/join).

The Low Emission Development Strategies (LEDS) Global Partnership was founded in 2011 to enhance coordination, information exchange, and cooperation among countries and international programs working to advance low emission climate resilient growth. The LEDSGP Global Partnership currently brings together LEDSGP leaders and practitioners from more than 120 countries and international institutions through innovative peer learning and collaboration forums and networks. For the full list of participants and more information on partnership activities, see [ledsgp.org](http://ledsgp.org).
