

RAPID toolkit

Regulatory and Permitting Information Desktop (RAPID) Toolkit For RAPID access to regulatory and permitting information

Permitting Atlas

The RAPID Toolkit provides overviews of regulatory and permitting requirements at the federal and state levels, and allows users to compare requirements among states and technologies. For example, a developer can look up land access requirements for a particular state, or compare requirements across multiple states.

Three Ways to Navigate

Project Type

Permitting at a Glance

Partial Example: Project Type: Water Access/Right: Jurisdiction:

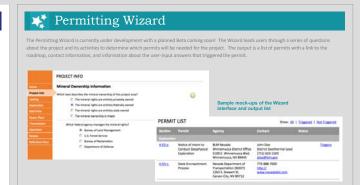

Regulatory Roadmap

requirements for developing energy projects, including topics such as land access, siting, exploration, drilling, plant construction and operation, grid interconnection, water resource acquisition, and relevant environmental considerations. The Roadmap includes a dashboard. flowcharts and supporting materials, including links to relevant regulations and documents.

4-FD-a Exploration Application Process BLM

Resource Library

permitting documents that are publicly available on other websites. Users can search the library to find related documents, or add to the library by providing links to additional documents.

communication is the

NEPA Database

The NEPA Database is a collection of documents and metadata for previously conducted NEPA analyses that can be used to inform future NEPA analyses. The database catalogs proposed activities, timelines, applications, reports and decision documents, impacted resources, and proposed and imposed mitigations for these

Review list of potential (36)

BENEFITS

- stakeholders involved in the permitting process.
- · Facilitate communication among agencies. · Save agencies time in explaining permitting process to
- industry and to their own personnel.
- . Help in training new staff and in documenting procedures.
- · Help to provide consistency among an agency's multiple offices.
- · Serve as a model for jurisdictions that have vet to develop permitting regulations.
- Provide an online forum for maintaining and communicating permitting processes, and for making documents available
- Provide the data and background analysis needed to inform policymakers and stakeholders in developing new
- · Provide service to agencies in times of continually decreasing budgets.
- · Decrease project risk by reducing delays and costs and eliminating uncertainties
- Provide greater assurance to stakeholders that the project will be conducted in a technically, environmentally, and socially responsible fashion.

WHITE HOUSE INITIATIVES

The activities in this project help to support the following initiative:

White House Executive Order (March 22, 2012) – Improving Performance of Federal Permitting and Review of Infrastructure Projects

Presidential Memorandum (May 17, 2013) -- Modernizing Federal Infrastructure Review and Permitting Regulations, Policies, and Procedures

White House Report (May 2013) — Rebuilding America's Infrastructure: Cutting Timelines and Improving Outcomes for Federal Permitting and Review of Infrastructure Projects Presidential Memorandum (June 7, 2013) -- Transforming our Nation's Electric Grid Through Improved Siting, Permitting, and

White House Fact Sheet (May 14, 2014) -- Building a 21st Century Infrastructure: Modernizing Infrastructure Permitting

White House Implementation Plan (May 2014) — Implementation Plan for the Presidential Memorandum on Moderniz Infrastructure Permitting Steering Committee on Federal Infrastructure Permitting and Review Process Improvement

Concern: Understanding authority in California is difficult. Jurisdictional authority changes from county to

EXAMPLE SUCCESS STORIES

Concern: Water monitoring was required at the federal, state, and locals levels - different sets of design and reporting requirements.

Outcomes: Saves developers time and effort and makes agencies more aware of the concerns and requirements of other jurisdictions; increases communication among agencies.

Action: Development of roadmaps and meetings with agenciestindustry. The roadmap outlines nuances, leading developers/agencies to better understand permitting in California.

Outcomes: Roadmaps indicating appropriate contacts for each permit by jurisdiction. Roadmaps are helpful not only to developers, but also to agency personnel when navigating complex permitting structures.

Providing Certainty in Uncharted Territory

The state of the s

Access NEPA-related documents

Development of the regulatory recomman or ucorazon

Connect: Because no geothermal power bad yet been developed in Colorado, investors were worried about funding a project that would be the first to test the permitting uniscape in this state.

Action: Worked with local, state, and federal appencies in Colorado to readmap the regulatory and permitting process for geothermal development in Colorado.

Outcomes: Provided more confidence to investors: state agencies used roadmap to train employees in new

Providing Guidance to States

ent of Geothermal Regulations in New Mexico

Development of Geothermal Regulations in New Mexico.

Concern: In 27th, New Mexico was in the midst of developing geothermal regulations, and determining the division of state authority among agencies.

Action: The RAPD team met with May agency personnel to review the current NM regulations and information on geothermal regulations offer states.

Outcomes: The information in the RAPD Toolst served as a valuable resource to NM state agency personnel working to develop regulations to understand how geothermal was managed in other states and what might work best for PAIL.

FUTURE SUCCESS

Next Steps for Us (The RAPID Toolkit Team)

Conduct user interviews, focus groups, heat mapping of website, site statistics.
Redesign the website – Version 1 is scheduled for release 10/31/2014.
Version 2 is already in the design phase, and is scheduled to be rolled out

Add Content •Plans to continue to work with transmission and solar groups to add content. Kick off content development for hydropower in 2015.

*Potential plans to add wind power in 2016. Gain commitment form agencies to adding and maintaining content:

*Meet with as many agencies as possible,

*At all levels – federal, regional, state, local

*For all technologies
*Try to get on agency agendas for regularly scheduled meetings.
*Potentially develop promotional video with testimonials from agencies.

Continue working with the White House Implementation Plan team to incorporate into Federal Permitting Dashboard.

Next Steps for **You** (Agencies, Developers, Consultants)

Adopt RAPID *Watch relevant pages – you will get emailed with any modifications

*Conduct annual review of relevant content – has your agency had any procedural changes in the past year that should be indicated in the Toolkit? (agencies) ·Print out and bring to meetings with industry/agencies

 Use as a training manual for your staff Provide feedback on updates - on the site, email us

Feedback *Edit data - update contact information, suggestions for others, upload

Share and discuss with others in your organization/agency
 Discuss with superiors for adoption and maintenance (agencies)
 Make agency personnel and other developers aware of RAPID and ask them
 to use and help to maintain it.
