

## Solar Screening Application for Universities

The National Renewable Energy Laboratory (NREL), in support of the U.S. Department of Energy's (DOE) SunShot Initiative, is offering technical assistance to universities seeking to go solar. To apply for a no-cost assessment of the technical and economic feasibility of solar photovoltaic (PV) on your campus, please save this form to your desktop, fill out the application and return it to [Kate.Anderson@nrel.gov](mailto:Kate.Anderson@nrel.gov).

If your application is selected, NREL will contact you for additional information related to the analysis, including electric load profiles, utility rate tariffs, and identification of space available for PV on your campus.

1. Contact information

Name:

Title:

University name:

University address:

Phone:

Email:

2. Describe your campus sustainability, energy, or carbon goals.

3. What are your greatest challenges or needs for support in reaching these goals?

4. Describe your current sustainability efforts. What type and size of on-site generation do you currently have?

What future projects are planned?

5. What is the annual electricity consumption on your campus?

What is the annual electricity cost?

6. What is the approximate land area of your campus?

What is the approximate population?

Is your campus expected to grow in future years? If so, by how much:

7. If selected, are you able to provide a 15-minute or hourly electric load profile for one year?
