3.1.2 Public Perception of Best Fuel and Worst Fuel for Use in Personal Vehicles When Gasoline Is No Longer Available (2000 and 2004) ..... 12
3.1.3 Reasons Electricity Would Be the Best Fuel for Use in Personal Vehicles When Gasoline Is No Longer Available (2000 and 2004) ..... 13
3.1.4 Reasons Ethanol Would Be the Best Fuel for Use in Personal Vehicles When Gasoline Is No Longer Available (2000 and 2004) ..... 14
3.1.5 Reasons Hydrogen Would Be the Best Fuel for Use in Personal Vehicles When Gasoline Is No Longer Available (2000 and 2004) ..... 14
3.1.6 Reasons Electricity Would Be the Worst Fuel for Use in Personal Vehicles When Gasoline Is No Longer Available (2000 and 2004) ..... 15
3.1.7 Reasons Ethanol Would Be the Worst Fuel for Use in Personal Vehicles When Gasoline Is No Longer Available (2000 and 2004) ..... 15
3.1.8 Reasons Hydrogen Would Be the Worst Fuel for Use in Personal Vehicles When Gasoline Is No Longer Available (2000 and 2004) ..... 16
4.1.1 Trends in Vehicle-Attribute Preference (selected years, 1980-2005) ..... 17
4.1.2 Issue Is a Major Reason for Those NOT Considering the Purchase of an SUV (2003) ..... 17
4.2.1 Number of Years Public is Willing to Accept for Payback of Higher Fuel-Economy Vehicle (2002) ..... 18
4.2.2 Additional Amount the Public is Willing to Pay for a Vehicle with a 10 Percent Increase in Fuel Economy (2001) ..... 18
4.2.3 Public Preference Toward Purchasing a More Fuel-Efficient Engine with Different Fuel- Availability Options (2000) ..... 19
4.3.1 Names of Advanced Hybrid-Electric Vehicles Known by the Public (selected years, 2000-04) ..... 20
4.3.2 Public's Attitudes Toward Hybrid-Electric SUVs (2003) ..... 20
4.3.3 Level of Consideration for Gas-Electric Hybrid (August 2005) ..... 21
4.3.4 Importance of Gas Mileage in Next Vehicle (August 2005) ..... 21
4.3.5 Alternative Fuels to Replace Gasoline and Diesel Fuel in Vehicles (September 2005) ..... 22
4.3.6 Public's Willingness to Pay a Premium for a Clean Diesel Engine (2002) ..... 23
4.3.7 Purchase Preference Between Diesel and Gasoline Vehicles by Vehicle Type (2001 and 2005) ..... 23
4.3.8 Reasons for Rejecting a Diesel Option (2001 and 2005) ..... 24
4.3.9 Reasons for Choosing a Diesel Option (2001 and 2005) ..... 25
4.3.10 Vehicle-Purchase Preferences (2004 and 2005) ..... 26
4.3.1 Vehicle-Purchase Preferences - Hybrid-electric vs. Diesel (2004) ..... 26
4.3.12 Priority on Vehicle Attributes (2004) ..... 27
4.3.13 Vehicle-Purchase Preferences (May 2005) ..... 27

## 1. INTRODUCTION

This report was written to provide the U.S. Department of Energy's (DOE's) Office of Energy Efficiency and Renewable Energy (EERE) with an idea of how the American public views various transportation, energy, and environmental issues.

The data presented in the third edition of this report have been drawn from multiple sources: surveys conducted by the Opinion Research Corporation (ORC) ${ }^{1}$ for the National Renewable Energy Laboratory (NREL) that are commissioned and funded by EERE, Gallup polls, news organization polls, surveys conducted by independent groups and academic institutions, and other sources. Most of the surveys are telephone interviews conducted with randomly selected national samples of adults 18 and older (some were done via the Internet). The surveys use national samples, and the sample size is noted, wherever it is available. The surveys were selected based on their relevance to this overall topic.

The Consumer Views on Transportation and Energy report consists of four sections, including the introduction (Section 1). Section 2 examines public concern about U.S. dependence on imported oil and public assessment of the energy situation in the United States. Section 2 also examines public beliefs about actions to address energy problems, as well as actual and perceived effects of gasoline prices on individuals and households.

Section 3 analyzes what Americans think about alternative fuels such as electricity, ethanol, hydrogen, and other fuel types. Section 4 focuses on conventional and advanced-technology vehicles. In this report, advanced-technology vehicles include hybrid-electric and diesel vehicles. Section 4 also analyzes owners' decisions about purchasing more fuel-efficient vehicles and advanced-technology vehicles.

In this edition of Consumer Views on Transportation and Energy, ORC and Gallup poll results for 2002-2005 have been included. ORC surveys were conducted twice a year in 2002, 2004 and 2005 and once in 2003. ${ }^{2}$ The new Gallup polls were conducted throughout 2005. ORC and Gallup asked some of the same energy and environment questions during the past several years. The latest results have been added to the prior ones to show the most current opinions and trends during the past several years.

The report also features new questions from both ORC and Gallup. These 2005 surveys examined "hot" topics such as gas-price increases, environmental issues, and vehicle-purchase preferences.

[^0]
## 2. ENERGY, OIL, AND POLICY

Public opinion polls reveal that the U.S. public perceives the country's energy situation as a serious issue (Table 2.1.1). This section examines the public's assessment of the energy situation, actual and perceived effects of gasoline prices on driving, and public beliefs about actions to address energy problems.

### 2.1 PUBLIC ASSESSMENT OF THE ENERGY SITUATION

Q2.1.1: How serious would you say the energy situation is in the United States - very serious, fairly serious, or not at all serious?

Table 2.1.1. Seriousness of Energy Situation (selected years, 1977-2005)

| Date | Very serious <br> (\%) | Fairly <br> serious (\%) | Not at all <br> serious (\%) | No opinion <br> $(\%)$ |
| :--- | :---: | :---: | :---: | :---: |
| March 2005 | 31 | 56 | 10 | 3 |
| March 2004 | 29 | 57 | 12 | 2 |
| March 2003 | 28 | 59 | 11 | 2 |
| March 2002 | 22 | 63 | 12 | 3 |
| March 2001 | 31 | 59 | 9 | 1 |
| Feb. 1991 | 40 | 44 | 14 | 2 |
| Aug. 1990 | 28 | 45 | 23 | 4 |
| April 1979 | 44 | 36 | 16 | 4 |
| March 1978 | 41 | 39 | 15 | 5 |
| April 1977 | 44 | 40 | 11 | 5 |

Source: Gallup (selected years, 1977-2005), N=496
Q2.1.2: Do you think that the United States is or is not likely to face a critical energy shortage during the next five years?

Table 2.1.2. Likelihood to Face an Energy Shortage (selected years, 1978-2005)

| Date | Yes, is <br> $\mathbf{( \% )}$ | No, is not <br> $\mathbf{( \% )}$ | Already <br> facing one <br> $(\%)$ | No opinion <br> $(\%)$ |

| March 2004 | 49 | 47 | 1 | 3 |
| March 2003 | 56 | 40 | 1 | 3 |
| March 2002 | 48 | 49 | 1 | 2 |
| March 2001 | 60 | 36 | 1 | 3 |
| November 1978 | 45 | 41 | 4 | 10 |

Source: Gallup (selected years, 1977-2005), N=496

### 2.2 ACTUAL AND PERCEIVED EFFECTS OF GASOLINE PRICES ON DRIVING

Among those who responded to questions related to this section, it was clear that increases in gas prices affect driving habits and lifestyle traits. This is consistent with data showing that when gasoline prices are lower, people tend to use their vehicles more; and conversely, when gasoline prices increase, driving declines (Table 2.2.1).

Q2.2.1: As a result of the recent rise in gas prices, would you say you have - or have not done each of the following?

Table 2.2.1. Gas Price Increase - Effect on Lifestyle (June 2004)

| Lifestyle trait | Yes, have <br> (\%) | No, have not <br> (\%) | No opinion <br> (\%) |
| :--- | :---: | :---: | :---: |
| Made more of an effort to find the gas station <br> with the cheapest gas in your area | 69 | 30 | 1 |
| Seriously considered getting a more fuel- <br> efficient car the next time you buy a vehicle | 53 | 46 | 1 |
| Cut back significantly on how much you drive | 45 | 54 | 1 |
| Cut back significantly on your household <br> spending because of the higher gas prices | 34 | 66 | $*$ |
| Altered your summer vacation plans | 29 | 70 | 1 |

Source: Gallup (June 3-6, 2004), N=465

Q2.2.2: Have recent price increases in gasoline caused any financial hardship for you or your household?

Table 2.2.2. Gas Price Increase - Effect on Finances (selected years, 2000-2005)

| Timeframe | Yes, caused <br> hardship <br> $\mathbf{( \% )}$ | No, has not <br> caused <br> hardship <br> $(\%)$ | No opinion <br> $(\%)$ |
| :--- | :---: | :---: | :---: |
| Aug. 28-30, 2005 | 69 | 31 | 0 |

### 2.3 PUBLIC BELIEFS ABOUT ACTIONS TO ADDRESS ENERGY PROBLEMS

When it comes to opinions regarding priorities for the United States, protecting the environment and developing U.S. energy supplies are nearly equal in the minds of respondents. This trend was supported in surveys conducted by two different groups. (Tables 2.3.2 and 2.3.3).

Q2.3.1: Which of the following approaches to solving the nation's energy problems do you think the United States should follow right now:

Emphasize production of more oil, gas, and coal supplies OR
Emphasize more conservation by consumers of existing energy supplies.
Table 2.3.1. Energy Production Priorities - Production vs. Conservation (2001-05)

| Date | More <br> production <br> $\mathbf{( \% )}$ | More <br> conservation <br> $(\%)$ | Both/equally <br> (vol.) <br> $\mathbf{( \% )}$ | Neither/other <br> (vol.) <br> $\mathbf{( \% )}$ | No <br> opinion <br> $\mathbf{( \% )}$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| March 2005 | 28 | 61 | 7 | 2 | 2 |
| March 2004 | 31 | 59 | 6 | 2 | 2 |

| March 2001 | 33 | 56 | 8 | 1 | 2 |

Source: Gallup (2001-05), N=496
Q2.3.2: With which one of these statements about the environment and energy production do you most agree:

Protection of the environment should be given priority, even at the risk of limiting the amount of energy supplies (such as oil, gas, and coal), which the United States produces OR

Development of U.S. energy supplies (such as oil, gas, and coal) should be given priority, even if the environment suffers to some extent.

Table 2.3.2. Energy Production Priorities - Environment vs. Supply (2001-05)

| Date | Environment <br> (\%) | Development <br> of energy <br> supplies (\%) | Both/equally <br> (vol.) <br> (\%) | Neither/other <br> (vol.) <br> $(\%)$ | No <br> opinion <br> (\%) |

Q2.3.7: I am going to read some specific environmental proposals. For each one, please say whether you generally favor or oppose it.

Table 2.3.7. Environmental Proposals (March 2003)

| Proposal | Favor (\%) | Oppose <br> (\%) | No opinion <br> (\%) |
| :--- | :---: | :---: | :---: |
| Setting higher emissions and pollution <br> standards for business and industry | 80 | 19 | 1 |
| Imposing mandatory controls on carbon <br> dioxide emissions and other greenhouse gases | 75 | 22 | 3 |
| More strongly enforcing federal environmental <br> regulations | 75 | 21 | 4 |
| Setting higher auto emissions standards for <br> automobiles | 73 | 24 | $*$ |
| Expanding the use of nuclear energy | 43 | 51 | 6 |
| Opening up the Arctic National Wildlife <br> Refuge in Alaska for oil exploration | 41 | 55 | 4 |

Source: Gallup (March 2003), N=526
Q2.3.8: Regarding some possible ways of reducing U.S. dependence on imported oil, do you think the following are a good idea or a bad idea? (aided question)

Table 2.3.8. Ideas for Reducing Dependence on Imported Oil (May 2005)

| Idea (Top 10 Responses) | Good (\%) | Bad (\%) | OK/Can't <br> Rate (\%) |
| :--- | :---: | :---: | :---: |
| Require the auto industry to make cars that get better <br> gas mileage | 93 | 6 | 1 |
| Require the auto industry to make more fuel-efficient <br> cars | 90 | 8 | 1 |
| Build more solar power facilities | 90 | 6 | 3 |
| Build more wind-turbine farms to harness wind- <br> generated electricity | 87 | 6 | 6 |
| Increase funding for renewable energy research | 86 | 9 | 4 |
| Provide tax credits to people who buy more energy- <br> efficient appliances such as air conditioning, clothes <br> dryers, and water heaters | 84 | 13 | 3 |
| Promote the development of hydrogen-powered cars | 81 | 8 | 11 |
| Build more water-powered hydroelectric facilities | 81 | 11 | 8 |
| Provide tax credits to people who buy cars that get <br> good gas mileage | 79 | 19 | 2 |
| Promote the use of hydrogen fuel cell technology | 71 | 8 | 20 |

Source: Yale Environment Survey (May 2005), N=1,002

## 3. ALTERNATIVE FUELS

A number of surveys researched the U.S. adult population knowledge and opinions about alternative types of fuel such as electricity, ethanol, and hydrogen. Poll questions asked between 2000 and 2005 focused on knowledge and opinions about alternative fuels. Several of these survey questions demonstrate that opinions regarding safety and environmental attributes of these fuel sources have changed from 2000 to 2005.

Table 3.1.1. Factors Considered "Extremely Important" or "Very Important" in Influencing Decisions to Try a New Fuel Technology (2003)

| Factor | Percent |
| :--- | :---: |
| How safe the fuel is for drivers and passengers | 83 |
| The cost of the fuel | 78 |
| How far you can drive before refueling | 75 |
| The cost of the vehicle | 72 |
| The convenience of refueling | 67 |
| Environmental emissions | 67 |
| Whether the fuel source is domestic instead of foreign | 47 |
| How the new fuel system affects passenger and cargo space | 47 |
| Whether or not the fuel can be recycled | 45 |

Source: Harris poll for Millennium Cell and U.S. Borax Inc. (2003), $\mathrm{N}=1,006$.
Q3.1.2: Consider a future date when gasoline is no longer available. Which of the following do you think would be the best fuel for use in personal vehicles: electricity, ethanol, or hydrogen?

Table 3.1.2. Public Perception of Best Fuel and Worst Fuel for Use in Personal Vehicles When Gasoline Is No Longer Available (2000 and 2004)

| Fuel for Use in <br> Personal Vehicles | Best Fuel <br> (\%) |  | Worst Fuel <br> (\%) |  |
| :--- | ---: | ---: | ---: | ---: |
|  | $\mathbf{2 0 0 0}$ | August <br> $\mathbf{2 0 0 4}$ | $\mathbf{2 0 0 0}$ | August <br> $\mathbf{2 0 0 4}$ |
| Electricity | 52 | 41 | 15 | 21 |
| Hydrogen | 15 | 28 | 27 | 23 |
| Ethanol | 21 | 19 | 28 | 28 |

## 4. CONVENTIONAL, MORE FUEL-EFFICIENT, AND ADVANCEDTECHNOLOGY VEHICLES

Section 4 focuses on vehicle owners and the decisions they make about their vehicles. It consists of three sections that encompass survey data on owners' decisions about their conventional (i.e., gasoline) vehicles, as well as more fuel-efficient and advanced-technology vehicles.

### 4.1 VEHICLE OWNERS' DECISIONS ON CONVENTIONAL VEHICLES

Q4.1.1: Which of the following attributes would be MOST important to you in your choice of your next vehicle? (closed-ended)

Table 4.1.1. Trends in Vehicle-Attribute Preference (selected years, 1980-2005)

|  | J.D. Power (percent) |  |  |  | ORC (percent) |  |  |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Attributes | $\mathbf{1 9 8 0}$ | $\mathbf{1 9 8 1}$ | $\mathbf{1 9 8 3}$ | $\mathbf{1 9 8 5}$ | $\mathbf{1 9 8 7}$ | $\mathbf{1 9 9 6}$ | $\mathbf{1 9 9 8}$ | $\mathbf{2 0 0 0}$ | $\mathbf{2 0 0 1}$ | May <br> $\mathbf{2 0 0 4}$ | May <br> $\mathbf{2 0 0 5}$ |
| Fuel economy | 42 | 20 | 13 | 8 | 4 | 7 | 4 | 10 | 10 | 22 | 12 |
| Dependability | 31 | 40 | 38 | 41 | 44 | 34 | 36 | 32 | 29 | 26 | 33 |
| Low price | 14 | 21 | 30 | 29 | 31 | 11 | 5 | 11 | 8 | 10 | 6 |
| Quality | 4 | 7 | 11 | 12 | 8 | 19 | 20 | 21 | 22 | 19 | 20 |
| Safety | 9 | 12 | 9 | 10 | 14 | 29 | 34 | 24 | 29 | 23 | 26 |
| Don't know/ <br> none of these |  |  |  |  |  |  | 1 | 2 | 1 |  | 3 |
| Total | 100 | 100 | 100 | 100 | 101 | 100 | 100 | 100 | 99 | 100 | 100 |

Sources: For 1980s: J. D. Power (data based on new-car buyers). For 1996: ORC for
NREL. For 1998: ORC for NREL (1998a), N = 1,000. For 2000: ORC for NREL (2000a), $\mathrm{N}=941$. For 2001: ORC for NREL (2001c), $\mathrm{N}=989$. For 2004: ORC for NREL (2004a), $\mathrm{N}=949$. For 2005: ORC for NREL (2005a), $\mathrm{N}=1,012$.

In-market car buyers were asked about their views toward sport utility vehicles (SUVs).
Table 4.1.2. Issue Is a Major Reason for Those NOT Considering the Purchase of an SUV (2003)

| Issue | January <br> $\mathbf{2 0 0 3}$ | March <br> $\mathbf{2 0 0 3}$ |
| :--- | :---: | :---: |
| Price of gas | -- | 50 |
| Not the kind of vehicle I want | 51 | 45 |
| Rollover/safety concerns | 30 | 34 |
| Impact on foreign oil dependence | 28 | 31 |
| Impact on environment | 25 | 26 |
| Too big for the road | 23 | 23 |

Source: Kelley Blue Book (2003), N=524

### 4.2 VEHICLE OWNERS' DECISIONS ABOUT MORE FUEL-EFFICIENT VEHICLES

Q4.2.1: Suppose that the next vehicle you've decided to buy offers an option of better fuel economy, but at a higher price. The savings in fuel costs would pay back the higher price over time. How soon, in years, would the fuel savings have to pay back the additional cost to persuade you to buy the higher fuel-economy option?

Table 4.2.1. Number of Years Public is Willing to Accept for Payback of Higher Fuel-Economy Vehicle (2002)

| Years | Percent |
| :--- | ---: |
| 1 | 18 |
| 2 | 23 |
| 3 | 13 |
| 4 | 3 |
| 5 | 12 |
| 6 | - |
| More than 6 | 3 |
| Don't Know | 27 |
| Total | 100 |
| Mean | 2.9 |

Source: ORC for NREL (2002b), N=1,000
Q4.2.2: How much more would you be willing to pay for the vehicle that gets $10 \%$ better fuel economy than for the vehicle you currently drive?

Table 4.2.2. Additional Amount the Public is Willing to Pay for a Vehicle with a 10 Percent Increase in Fuel Economy (2001)

| Dollar Amount | Percent |
| :--- | ---: |
| Less than $\$ 500$ | 7 |
| $\$ 500-\$ 1,000$ | 15 |
| $\$ 1,001-\$ 2,500$ | 17 |
| $\$ 2,501-\$ 5,000$ | 15 |
| More than $\$ 5,000$ | 5 |
| Nothing more | 18 |
| Don't know | 103 |
| Total | $\$ 2,143$ |
| Mean $^{1}$ (including none) | $\$ 2,799$ |
| Mean $^{1}$ (excluding none) |  |

Source: ORC for NREL (2001b), Study No. 710449, N=180
${ }^{1}$ In this report, calculation of means, medians, and standard deviations are based on raw numbers. "Don't know" responses are not part of the calculations.

Q4.2.3: Suppose you have decided to buy a new vehicle and have a choice of an optional engine that requires a new fuel that costs the same as gasoline and is just as good as gasoline.

Version A: The optional engine costs the same as the conventional one but gets $50 \%$ more miles per gallon. However, the fuel it requires is sold only at 1 in 10 stations. Which would you most likely buy?

Version B: The optional engine costs the same as the conventional one but gets $50 \%$ more miles per gallon. However, the fuel it requires is sold only at 1 in 5 stations. Which would you most likely buy?

Version C: The optional engine costs the same as the conventional one but gets $50 \%$ more miles per gallon. However, the fuel it requires is sold only at 1 in 3 stations. Which would you most likely buy?

Table 4.2.3. Public Preference Toward Purchasing a More Fuel-Efficient Engine with Different Fuel-Availability Options (2000)

|  | Fuel-Availability Options | Conventional Engine (\%) | Optional Engine (\%) | $\begin{gathered} \text { Don't } \\ \text { Know/Refused } \\ (\%) \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: |
| A | The optional engine costs the same as the conventional one, but gets $50 \%$ more miles per gallon. However, the fuel it requires is sold only at 1 in 10 stations. | 66 | 30 | 4 |
| B | The optional engine costs the same as the conventional one, but gets $50 \%$ more miles per gallon. However, the fuel it requires is sold only at 1 in 5 stations. | 62 | 36 | 3 |
| C | The optional engine costs the same as the conventional one, but gets $50 \%$ more miles per gallon. However, the fuel it requires is sold only at 1 in 3 stations. | 43 | 53 | 4 |

### 4.3 VEHICLE OWNERS' DECISIONS ABOUT ADVANCED-TECHNOLOGY VEHICLES

## Hybrid-Electric Vehicles

Q4.3.1: There are some vehicles in the U.S. market today that have hybrid-electric powertrains that combine an electric motor and a gasoline engine to achieve a higher fuel economy than similar-sized vehicles. Please name one of these hybrid vehicles, if you can.

Table 4.3.1. Names of Advanced Hybrid-Electric Vehicles
Known by the Public (selected years, 2000-04)

|  | Percent |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | August 2000 | November 2001 | November 2002 | May 2004 |
|  | 36 | 44 | 51 | 48 |
| Honda | 15 | 24 | 24 | 17 |
| Toyota | 4 | 11 | 10 | 9 |
| Ford | NA | NA | NA | 6 |
| Other | 14 | 6 | 7 | 4 |
| Don't Know | 64 | 56 | 48 | 52 |

Source: ORC for NREL (2000) N=953, (2001) N=999, (2002c) N=999, (2000a) N=1,000, (2004a) $\mathrm{N}=1,000$
Note: Percentages do not total 100, because each respondent could volunteer more than one response.
A 2003 survey of in-market consumers by Kelley Blue Book examined the influence of the media on attitudes toward SUVs. Although no hybrid-electric SUVs were available in the United States at the time of this survey (mid-2003), shoppers would think favorably of such an option and might be more likely to consider the purchase of an SUV.

Table 4.3.2. Public's Attitudes Toward Hybrid-Electric SUVs (2003)

|  | Percent |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | SUV Considerers |  | SUV <br> Non-Considerers |  | Total |  |
|  | Jan 2003 | Mar 2003 | Jan 2003 | Mar 2003 | Jan 2003 | Mar 2003 |
| More favorable toward SUVs | 52 | 46 | 45 | 44 | 48 | 45 |
| Neutral | 40 | 46 | 44 | 51 | 42 | 49 |
| Less favorable toward SUVs | 8 | 7 | 11 | 5 | 10 | 6 |

Source: Kelley Blue Book (2003), N=524

Q4.3.3: Suppose you were going to buy a new vehicle. Would you seriously consider buying a car or SUV that is a gas-electric hybrid, or not? If the hybrid vehicle cost $\$ 3,000$ more than the standard model of the same vehicle would you still seriously consider buying it, or not?

Table 4.3.3. Level of Consideration for Gas-Electric Hybrid (August 2005)

| Response | Percent |
| :--- | ---: |
| Yes, seriously consider | $\mathbf{5 5}$ |
| Even if $\$ 3,000$ more | 45 |
| Not, if $\$ 3,000$ more | 9 |
| No, would not | $\mathbf{4 3}$ |
| No opinion | $\mathbf{2}$ |

Source: Gallup (August 2005), $\mathrm{N}=1,007$

Q4.3.4: When you buy or lease your next vehicle, will the car's gas mileage be a more important consideration for you that it has been in the past, or will it not be any more important to you?

Table 4.3.4. Importance of Gas Mileage in Next Vehicle (August 2005)

| Response | Percent |
| :--- | ---: |
| More important | 75 |
| Not more important | 22 |
| Less important | $*$ |
| Don't drive | 1 |
| No opinion | 2 |

Source: Gallup (August 2005), $\mathrm{N}=1,007$

## Diesel Vehicles

Q4.3.5: What fuels would you like to see replace gasoline and diesel fuel in the vehicles used in the United States? Anything else? (unaided question)

Table 4.3.5. Alternative Fuels to Replace Gasoline and Diesel Fuel in Vehicles (September 2005)

| Response | Total <br> $\mathbf{( \% )}$ | Small car <br> $\mathbf{( \% )}$ | Large <br> car (\%) | Minivan <br> $\mathbf{( \% )}$ | Pickup/ <br> van (\%) | SUV <br> $\mathbf{( \% )}$ |

Note: Percentages do not total 100, because each respondent could volunteer more than one response.

Reasons for Rejecting the Diesel Option ( 723 respondents in 2001 and 381 respondents in 2005)

If chose diesel, ask:
Q4.3.9: Why did you choose the diesel option? (unaided question)
Table 4.3.9. Reasons for Choosing a Diesel Option (2001 and 2005)

| Reasons | 2001 (\%) | Sept. 2005 (\%) |
| :--- | ---: | ---: |
| Fuel economy (better gas mileage/fuel economy, 40\% <br> better mileage/miles per gallon) | 46 | 42 |
| Cost (saves money/pays for itself over time, cheaper than <br> gasoline, economical) | 34 | 41 |
| Dependability (diesel engine lasts longer, more reliable) | 12 | 9 |
| Environmental (burns cleaner, other related mentions) | 10 | 7 |
| I have/drive vehicle with diesel engine | 4 | 3 |
| More power/horsepower | 3 | 3 |
| Other /don't know | 10 | 9 |

Source: For 2001: ORC for NREL (2001c), Study No. 710288, N=266. For 2005: ORC for NREL (2005b), Study No. 714388, N=1,042
Note: Percentages do not total 100, because each respondent could volunteer more than one response.

## General Preferences

Q4.3.10: Which one of the following are you planning to purchase for your next household vehicle?

Table 4.3.10. Vehicle-Purchase Preferences (2004 and 2005)

| Type of Vehicle | $\mathbf{2 0 0 4}$ | May <br> $\mathbf{2 0 0 5}$ | September <br> $\mathbf{2 0 0 5}$ |
| :--- | ---: | ---: | :---: |
| Large car, same size or larger than a Honda <br> Accord, Chevy Malibu, or Toyota Camry | 28 | 25 | 22 |
| SUV or sport utility vehicle | 23 | 17 | 17 |
| Small car, smaller than a Honda Accord, Chevy <br> Malibu, or Toyota Camry | 20 | 24 | 33 |
| Pickup truck or large van | 18 | 15 | 14 |
| Minivan | 6 | 9 | 9 |
| Other/ don't know | 4 | 9 | 4 |
| Do not plan to purchase new household vehicle | N/A | N/A | $* *$ |
| Total | 99 | 99 | 99 |

Source: ORC for NREL (2004a), Study No. 713218, N=1,000. For May 2005: ORC for NREL (2005a), $\mathrm{N}=1,012$. For September 2005: ORC for NREL (2005b), Study No. 714388, N=1,042
** Because "don't plan to purchase new household vehicle" was not an optional response during the first two surveys, we have normalized the September 2005 results to reflect that difference.

Q4.3.11: When you purchase your next household vehicle, how likely are you to buy each of the following?

Would you say you definitely will buy it, you would be very likely to buy it, you would be likely to buy it, you would be not likely to buy it or you definitely won't buy it?

Table 4.3.11. Vehicle-Purchase Preferences - Hybrid-electric vs. Diesel (2004)

| Type of Vehicle | Percent |  |
| :--- | ---: | ---: |
|  | Hybrid- <br> electric | Diesel |
| Definitely will buy | 7 | 4 |
| Very likely to buy | 8 | 4 |
| Likely to buy | 27 | 14 |
| Not likely to buy | 31 | 36 |
| Definitely won't buy | 20 | 38 |
| Don't know | 6 | 3 |
| Total | 99 | 99 |

Source: ORC for NREL (2004a), Study No. 713218, N=1,000

Q4.3.12: Suppose you were given an extra $\$ 1,000$ that you must spend on acceleration, fuel economy and/or the ability to tow, when buying your next vehicle. How much would you spend on each attribute? You can spend all the money on one attribute or split it among two or three attributes.

Table 4.3.12. Priority on Vehicle Attributes (2004)

| Attribute | Dollars |
| :--- | ---: |
| Fuel economy | $\$ 609$ |
| Acceleration | $\$ 248$ |
| Ability to tow | $\$ 143$ |
| Total | $\$ 1,000$ |

Source: ORC for NREL (2004a), Study No. 713218, N=1,000

Q4.3.13: Which one of the following are you planning to purchase for your next household vehicle?

Table 4.3.13. Vehicle-Purchase Preferences (May 2005)

| Type of Vehicle | Percent |
| :--- | ---: |
| A new vehicle in fewer than 3 years | 24 |
| A new vehicle in 3 to 6 years | 20 |
| A new vehicle in 7 or more years | 7 |
| A used vehicle in fewer than 3 years | 18 |
| A used vehicle in 3 to 6 years | 14 |
| A used vehicle in 7 or more years | 4 |
| Don't drive | 3 |
| Don't know/do not plan to purchase household <br> vehicle | 9 |
| Total | 99 |
