

## What is Save Energy Now?

**Save Energy Now is part of “Easy Ways to Save Energy,” a national campaign announced by the Secretary of Energy in 2005. This campaign offers simple but effective energy choices, assists U.S. industry and the federal government in reducing their energy use, and supports national goals for greater energy security.**

**Save Energy Now is helping industrial plants find effective ways to reduce energy use in steam and process heating so they can operate more efficiently and profitably. This effort also addresses energy-savings opportunities for compressed air, fan, motor, and pumping systems.**

### A Strong Energy Portfolio for a Strong America

Energy efficiency and clean, renewable energy will mean a stronger economy, a cleaner environment, and greater energy independence for America. Working with a wide array of state, community, industry, and university partners, the U.S. Department of Energy's Office of Energy Efficiency and Renewable Energy invests in a diverse portfolio of energy technologies.

Energy Efficiency and Renewable Energy

Bringing you a prosperous future where energy is clean, abundant, reliable, and affordable

# Save Energy Now

**S**erious energy supply disruptions and recent hikes in energy prices are impacting the entire United States, including the nation's industries. Save Energy Now can help U.S. manufacturers reduce their energy and operating costs, lower their utility bills, and ensure future savings.

Save Energy Now is part of the U. S. Department of Energy's "Easy Ways to Save Energy" campaign. It helps manufacturing facilities remain competitive during a time of diminished supplies and rising energy costs. Join in this initiative and begin saving energy—and money —today.

## Who can join Save Energy Now?

We invite companies, states, utilities, and other industry groups to join this effort. Take part in improving industrial efficiency and productivity while helping to ensure a reliable U.S. energy supply.

## How can I participate?

You can participate in any of these ways:

### *Apply for an Energy Savings Assessment.*

By applying online today, your facility could be among the large, energy-using U.S. plants selected to receive an on-site Energy Savings Assessment by a DOE qualified energy efficiency expert.

An assessment will help you identify immediate and long-term opportunities to save money in your plant, focusing on steam process heating systems. This could enhance your operation's efficiency, productivity, and profitability.

While only 200 Energy Savings Assessments will be performed, your company could still be eligible for a priority assessment from ITP's university-based Industrial Assessment Centers (IAC).

### *Become a partner.*

You can partner with ITP to create awareness about energy efficiency and cost savings within your own company or among your customers. Earn recognition by working with ITP to cosponsor events and training sessions, link to the Save Energy Now Web site, and help disseminate important information to as many as 50,000 U.S. plants.

### *Use ITP resources.*

Take advantage of the many resources that ITP provides to address U.S. industry's energy management needs.

## What does Save Energy Now provide U.S. industry?

In addition to the Energy Savings Assessments and priority IAC assessments, Save Energy Now offers industry many other benefits, including:

- Phone consultations and technical assistance provided by experts at the EERE Information Center
- Training, Webcasts, and workshops on the use of ITP's suite of powerful software analysis tools and ways to improve efficiency and productivity throughout the plant
- An extensive portfolio of helpful information such as tip sheets, case studies, handbooks, CD-ROMs, and more
- Recognition on the ITP Web site.

## Why should my company take part?

Energy savings equal cost savings. Fuel and electric power for steam, process heating, and other process systems make up 80% of the energy used in the U.S. industrial sector. But energy losses can add up to nearly 35% of that amount. Save Energy Now helps industries find ways to reduce those losses, boost energy efficiency, and save money. Work with ITP to identify opportunities and help your company prosper today and in the future.

## Get started today!

See the Save Energy Now Web site at [www.eere.energy.gov/industry/saveenergynow](http://www.eere.energy.gov/industry/saveenergynow) to apply for an assessment and to find out how to partner with ITP in this important new initiative. Call the EERE Information Center at 1-877-337-3463 to learn more.
