

Federal Fleet Files

Vol. 2, No. 6 – April 2010

Highlighting the latest news and developments affecting Federal fleets.

Section 701 Updates: Focusing on Data Quality

Section 701 of the Energy Policy Act (EPAct) of 2005 requires the use of alternative fuels in Federal dual-fueled alternative fuel vehicles (AFVs) unless the Secretary of Energy determines that an agency qualifies for a waiver. The U.S. Department of Energy (DOE) Federal Energy Management Program (FEMP) is currently working to update the Section 701 process. This current update affects waiver review in fiscal year 2011 and beyond, and will enable the process to be more focused on ensuring that waivers are granted based on the best quality data and information available.

Location entries will be validated for accuracy (e.g., ensuring that the zip code matches the city and state). Reviews will also be cross-checked with Energy Independence and Security Act (EISA) of 2007 Sections 246 and 141 data submissions, and supporting evidence will be used in waiver review. Examples of supporting evidence include instances where reviewers are aware an agency fleet has access to an alternative fuel that is not reflected in the Advanced Vehicles Data Center (AFDC) Alternative Fuel Station Locator database (e.g., they have a fueling truck). Another example of supporting evidence could be if agency vehicles are located in geographically large zip codes, and whether or not the precise location of the vehicle within that zip code would affect the waiver request. Agencies are strongly encouraged to use address and/or latitude/longitude coordinates when requesting waivers in order to receive the most accurate results.

Save the Date: 2010 Regional EPAct Workshops

To continue building on the success of the 2009 Regional EPAct Workshops, DOE's State and Alternative Fuel Provider Fleets Program is sponsoring a series of regional workshops in 2010. The workshops provide technical, regulatory, and networking support to assist EPAct-regulated fleets and alternative fuel stakeholders with overcoming deployment barriers.

The next 2010 Regional EPAct Workshop will be held **Wednesday, May 19, 2010, in Chicago, Illinois**. Workshop information and updates are available at www.vehicles.energy.gov/epact/workshops.html. Federal agencies should provide point of contact information in the Chicago area to Ryan Daley at the National Renewable Energy Laboratory (NREL) via e-mail at ryan.daley@nrel.gov.

Conservation in Action: Clean Cities and the National Park Service

In 2010, DOE's Clean Cities program reinstated the Clean Cities National Parks Initiative, which focuses on deploying AFVs and advanced technology vehicles within the national parks system. The Clean Cities program supports the mission and goals of the National Park Service to protect the nation's environmental and cultural resources. Project selection is ongoing and the program will soon announce which park units have been selected for fiscal year 2010 funding.

Greenhouse Gas Concentrations

Following Executive Order (E.O.) 13514, DOE developed a crosswalk covering sustainability and energy goals and targets within executive orders and other statutes. The crosswalk aligns goals and targets from E.O. 13514, E.O. 13423, and statutes to assist Federal managers in identifying current requirements. The crosswalk is available at www.femp.energy.gov/docs/sustainabilitycrosswalk.doc.

Summer Session: Preparing for June Reporting Requirements

Federal fleets should continue planning for the following June reporting requirements.

- Strategic Sustainability Performance Plans (SSPP)
- Office of Management and Budget (OMB) Transportation Scorecard Midyear Report
- EPAct 2005 Section 701 Waiver Requests
- EISA Section 246 Annual Reports

Additional information on these reporting requirements is available at www.femp.energy.gov/program/fedfleet_management.html.

Alternative Fuel Finder

The National Renewable Energy Laboratory (NREL) maintains a database of alternative fuel stations nationwide through the DOE Alternative Fuels and Advanced Vehicles Data Center (AFDC). The list below shows new alternative fuel stations added to the database since last publication. **Unless otherwise noted, only open, publicly accessible stations that accept Wright Express are included.** Check the AFDC Alternative Fuel Station Locator for up-to-date information: www.afdc.energy.gov/afdc/locator/stations/

Type	Station Name	Street Address	City	ST	Waivers ¹	Agencies Affected ²
BD	Eblen Short Stop #6	425 Broadway St	Asheville	NC	n/a	n/a
