

Solar Power Prospector

**Solar Resource
Assessment Workshop
Denver, CO**

Christopher W. Helm

October 29, 2008

Outline

1. Application Overview
2. Goals
3. Primary Functionality
4. Demo

Application Overview

1. Map based interface
 - View GIS Datasets
 - Spatial Relationships
2. Download Historical Perez (SUNY) Data
 - 1998 - 2005
 - 10km Grid
3. Location specific look at resources
 - Basic data statistics

Application Goals

1. Engage industry partners
 - In application development
 - In functionality enhancements / tool improvements
2. Develop an easy to use map
 - Aids in spatial understanding of solar resources
 - Assists in locating areas for potential development
