The SPIDERS Microgrid at Fort Carson

SPIDERS Microgrid Region

2 MW Solar Array
CARSON SOLAR, 2 MW
The LEED ratings systems were developed by the U.S. Green Building Council (USGBC) to provide building owners and operators a concise framework for identifying and implementing practical and measurable green building design, construction, operations and maintenance solutions.

Fort Carson has one of the largest concentrations of federally funded, LEED-certified projects in a single location.

All newly constructed buildings must be LEED Silver or better.
