

NREL Photovoltaic Reliability Workshop—Golden, Colorado

February 24–27 2015

The 2015 Photovoltaic Reliability Workshop (PVMRW) sessions will continue in the tradition of this annual event. Participation will require sharing of a paper—either an oral or poster presentation—by each company at some time during the week. Targeted topics will include potential-induced degradation, adhesion, and observations from the field. There will be a general session, break-out sessions by technology area, and poster sessions on Tuesday, Wednesday, and Thursday.
