c. Abstract:

This report presents selected results from the 2002 Household Travel Survey for the St. Louis region. The survey collected weekday travel behavior characteristics from a representative sample of households residing in each of the eight counties that comprise the St. Louis region. Survey methods included both telephone interviews to collect demographic information about persons and households in the region and a travel log that was designed to capture activity and travel information for household members during a 24-hour timeframe. The data will be used to update transportation demand forecasting models and to identify transportation needs in the region. All data collection activities conformed to standard procedures for conducting household travel surveys. The sampling, survey design, and reporting methodologies are recognized by major research organizations, including the Transportation Research Board (TRB), the American Association of Public Opinion Research (AAPOR), and the Council of American Survey Research Organizations (CASRO).

d. Additional Information:

e. Grant/Sponsor Information:

f. Data Information

Type of Data

1. *Qualitative or Quantitative?:* Both
2. *Collection Method:* Telephone interview (CATI) / Mail-in Survey
3. *Travel Journal kept?:* Yes
4. *Confidential information?:* None
 - a) *Pseudonyms?:* No pseudonyms used
5. *Copyright data?* No

Metadata Under ICPSR Standards

Data Description

1. *Area Studied:*
Included the City of St. Louis, St. Louis County, and parts of Jefferson County, Madison County, St. Clair County, Monroe County, and St. Charles County.
2. *Group studied:* Households
3. *Universe of Study:*
The survey universe was defined as all households with telephones located within the Missouri counties of St. Louis, St. Louis City, Franklin, Jefferson, and St. Charles, and the Illinois counties of Madison, Monroe, and St. Clair.
4. *Study Period:* 4/1/2002 - 12/12/2002
5. *Collection Period:* 4/1/2002 - 12/12/2002
6. *Data:*
5 .SAV data files – Household, Person, Location, and 2 Trip Files (one linked, one unlinked)
7. *Smallest data unit:* Household member
8. *Smallest geo-unit:* County
9. *Sampling Method:* Please see documentation provided.
10. *Response Rate:* Unknown
11. *Measure Tool:* N/A
12. *Weights:*
Weighted by geography. Please see documentation for more details.
13. *Number of Households:* 5,094
14. *Number of Entries:* 15,030
