c. Abstract:

The Puget Sound Transportation Panel is the first general-purpose travel panel survey in an urban area in the United States. Initiated in 1989 by the Puget Sound Council of Governments (now the Puget Sound Regional Council), it is similar in design and direction to the Dutch National Mobility Panel, but is also descended from the long line of cross-section urban travel surveys in U.S. metropolitan areas and is more focused on the transportation and transit policy issues in U.S. cities.

After the first wave, there was a follow-up in February, 1990, of an attitudes and values survey, developed by transit marketing and university researchers. The second wave, including full interviews and travel diaries, as well as some panel refreshment, took place in the fall of 1990. After the first wave, there was a follow-up in February, 1990, of an attitudes and values survey, developed by transit marketing and university researchers.
