Overview

The Household/Activity Travel Survey for the Wichita Falls area consisted of households in Wichita County. The primary objective for the survey was to gather accurate travel and activity data from residents living in the region. The results of the survey will be used to update regional travel demand models. A wide range of data was gathered, including:

- trip production rates by trip purpose
- trip distribution by time of day
- trip length frequency distribution
- modal share of travel
- auto occupancies
- vehicle operating speeds

The survey for the Wichita Falls Urban Transportation Study (WFUTS) consisted of households in the Wichita Falls Metropolitan Planning Organization (MPO) study area. This report describes the sampling methodology that was used for the Wichita Falls MPO study area and includes data in the trip table and appendices for respondents from the Wichita Falls MPO study area only.

Selecting the Sample

At the beginning of the project, ETC Institute and representatives from TxDOT and TTI (Texas Transportation Institute) met to review the data requirements for the region's travel demand model. Since the primary purpose of the regional household activity travel survey is to support regional travel demand forecasting models, this meeting served as a forum to ensure the research team had a clear understanding of the data requirements for the region's travel demand model.

The sample was stratified on two variables: household size and annual household income. As specified by TxDOT, there were four categories for household size (1, 2, 3, and 4+ persons) and five categories of household income (\$0-\$17,499, \$17,500-\$32,499, \$32,500-\$49,999, \$50,000-\$74,999, and \$75,000 or more). The total of all cells in the sample plan was to be at least 2,000 complete and useable surveys. Tables 1 and 2 show the sampling goals and the actual number of completed surveys that were obtained for each combination of household size and income category cell.

Table 1
Sampling Goals by Type of Household
(WFUTS)

	Household Size				
Income Ranges	1	2	3	4+	Totals
\$0 to \$17,499	68	107	46	57	278
\$17,500 to \$32,499	63	150	47	127	387
\$32,500 to \$49,999	58	150	95	150	453
\$50,000 to \$74,999	30	150	86	152	418
\$75,000 +	35	150	129	150	464
Totals	254	707	403	636	2,000

Table 2
Distribution of Completed Surveys by Type of Household

(WFUTS)

	Household Size				
Income Ranges	1	2	3	4+	Totals
\$0 to \$17,499	76	106	41	55	278
\$17,500 to \$32,499	78	151	50	119	398
\$32,500 to \$49,999	61	154	93	137	445
\$50,000 to \$74,999	33	159	87	146	425
\$75,000 +	37	157	128	154	476
Totals	285	727	399	611	2,022

The total number of completed surveys exceeded the contractual goal by 22 surveys. The goal was to complete 2,000. The actual number of completed surveys was 2,022. There was good geographic representation from the county included in the survey.

The number of completed surveys met or exceeded 89.2% of the goal for all combinations of household size and income.

In order to obtain the desired number of completed surveys, 15,462 telephone numbers were called. Of these:

- 2,768 (17.9%) resulted in contact with an eligible household that agreed to participate in the survey. Of those who initially agreed to participate in the survey, 2,022 households actually completed the survey.
- 5,628 (36.4%) resulted in contact with a household that refused to participate in the survey
- 2,505 (16.2%) resulted in contact with an ineligible household (including non-working, non-household, and non-voice lines)
- 4,561 (29.5%) were not able to be classified as eligible or ineligible after 8 call attempts

The table below shows the total number of attempts that were made per completed survey by size of household. On average, one in every 7.3 households that were contacted completed a survey.

Table 3			
Response Rate	s by Househo	old Size	
Household Size	Completed	Attempts	Attempts/Complete
One	285	1,729	6.0
Two	727	5,719	7.9
Three	399	2,596	6.5
Four or more	611	5,418	8.9
Total	2,022	15,462	7.3

Designing the Survey

ETC Institute worked with TxDOT and TTI staff to develop the household activity travel survey instrument. The survey was designed to be a 24-hour household activity travel diary that was kept by each member of the household. The household survey recruitment script and travel diary were structured and worded to allow participants to answer the questions easily.

The activity/travel survey mail-out package included the following materials:

- A general information letter explaining the survey.
- An activity/travel survey for each member of the household.
- Travel-day reminder sheet.
- Postage-paid return envelope.
- Contact name and toll free number in the event that the household had questions or concerns.
- A letter thanking the household for their participation in the study.
- ETC Institute worked with TxDOT and TTI to develop the survey materials.
 Copies of the survey instruments and supporting materials are provided in Appendix F.

Pilot Survey. ETC Institute conducted a pilot survey with 28 households during February of 2010 to assess and evaluate the methods, materials, and processes in conducting the activity/travel and GPS system data collection methods. The pilot survey included a complete pretest and evaluation of the full survey, including:

- sample generation
- telephone recruitment
- survey mail-out
- reminder call
- retrieval call
- data entry
- trip geocoding
- edit checks.

In addition, the pilot survey included the collection of trip data using GPS technology from 7 of the 28 households participating in the pilot survey. Key items that were assessed during the pilot survey included the following:

 Response rate of households agreeing to participate in the survey via telephone recruitment: Twenty-one percent (21%) or 34 of the 162

households that were initial contacted agreed to participate in the pilot test.

- Proportion of recruited households providing complete travel survey data: Of the households that initially agreed to participate, 82% or 28 of the 34 households actually provided complete travel survey data.
- Adequacy of survey forms and scripts for recruitment and retrieval:
 No problems were identified with the design of survey forms. Most participants indicated that the surveys were easy to understand.
- Proper function of GPS hardware and downloading software: No problems were encountered during the pilot survey.
- Use of edit check programs to test data input and file structure for errors: ETC Institute tested the initial edit check program that was provided by TTI. Based on the results of the pilot test, TTI made modifications to the edit check program.

Conducting the Household Activity Travel Survey

One factor that can greatly influence the quality of data collected is the percentage of households recruited that actually participate in the survey. A low response rate can inherently bias the survey results. Consequently, a great deal of emphasis was placed on measures that would maximize the response rate to the survey.

Based on the results of the pilot survey, ETC Institute recruited 2,768 households from the Wichita Falls MPO study area to participate in the survey. The goal was to have at least 2,000 households (or at least 70% of those recruited) provide complete travel diaries.

As a result of the thorough recruitment and aggressive follow-up procedures used by ETC Institute, the actual participation rate was 73%. A total of 2,022 of the 2,768 households that were recruited provided complete and useable surveys.

Building Awareness of the Household Survey. Given the private nature of the data to be collected, public awareness was an important factor to the success of the survey. Persons who participated in the pilot survey indicated that the initial letter from TxDOT was important because they knew the survey was legitimate.

ETC Institute worked with TxDOT to develop and administer an awareness campaign to inform the community about the survey. The campaign involved a two-tiered strategy.

- Tier 1: General Awareness: This tier involved building general awareness about the study in the region through newspaper and other general media sources. Press releases were sent by TxDOT to newspapers, radio stations, and television stations in the region. Prior to the survey, articles were published in area newspapers to promote the survey. Representatives from ETC Institute also met with representatives from each of the two metropolitan planning organization in the study area.
- Tier 2: Detailed Awareness. The second tier involved direct communication with each of the households that were recruited to participate in the study. ETC Institute worked with TxDOT and TTI to design a series of direct mailings that included reminder letters, advance letters, and refrigerator magnet reminders. In addition, ETC Institute established local and toll-free numbers that allowed households in the study area to contact ETC Institute if they had questions about the study.

Survey Administration Procedures. ETC Institute administered the Household Activity Travel Survey to a randomly selected sample of 2,022 households in the Wichita Falls MPO study area from April 2010 through September 2011.

Surveys were not administered when school was not in session (e.g., holiday periods and summer months). Each of the major elements of the survey administration process are briefly described below:

- Pre-notification Letter. ETC Institute mailed a pre-notification letter to all households that were randomly selected to participate in the survey. The letter was in both English and Spanish.
- Initial Solicitation. A few days after the pre-notification letters were mailed, ETC Institute called households, to solicit their participation in the survey. Bilingual interviewers were used to ensure Spanish speaking households were well represented. If a household agreed to participate, ETC Institute confirmed the address and collected household, vehicle, and person level data. This data included, but was not limited to, the following:
 - ⇒ Number of persons in the household.
 - ⇒ Annual household income and type of residence.
 - ⇒ Vehicle Information number owned, number available, make, model, commercial or private use.

- ⇒ Person information age, sex, ethnicity, employment/student status, occupation by employment category.
- ⇒ Employment Information self-employed, employer name and address, home office/business, telecommuting.

Information that was gathered from each of the participating households was entered into the Household Database as soon as the household was recruited. Each household that was recruited was assigned a unique record number that allowed ETC Institute to monitor the household's participation in the survey throughout the survey administration process.

- Mailing Travel Packets. Following the recruitment call, ETC Institute
 mailed households that agreed to participate in the survey an
 activity/travel survey packet. The packets were typically mailed seven
 days in advance of the households assigned travel-day. Spanish versions
 of the survey instrument and travel diaries were provided for households
 that did not speak English.
- Reminder Calls. ETC Institute placed a reminder call to each household the day before they were scheduled to begin the travel survey. The pretravel day reminder call was used to confirm the household's participation and reception of survey packet. The call was also used to (1) review the procedures for recording travel information to ensure participants understood the importance of recording specific addresses, (2) answer any questions that the household may have regarding the survey, (3) schedule a call-back time for the data retrieval call, (4) stress the importance of the survey, and (5) emphasize the anonymity of the data provided.
- Data Retrieval. ETC Institute placed a follow-up call at a pre-arranged callback time within two days after travel diary activity was scheduled. This call was used to retrieve household activity and trip data. Every attempt was made to personally interview each of the people who completed a travel diary. In some cases a proxy provided information for household members who were not available. Adult members of the household usually reported the activities and trips for minors in the household. After the activity and household information had been obtained over the phone, each household was asked to return the activity/travel surveys by mail in the postage-paid envelope provided in the survey packet. When the packets were received, ETC Institute reviewed the information on the activity/travel surveys that were returned by mail to ensure they matched the data provided by phone. If there were discrepancies, ETC Institute called the household back to clarify any missing or unclear information.

Among the 2,022 households that participated in the survey, ETC Institute was able to complete follow-up calls to verify the data provided with 2,002 (or 99% of the households). The average length of the retrieval interview was 30.2 minutes. Table 4 (below) shows the average length of the retrieval interview by size of household.

Table 4 Length of Retrieval Interview						
Household Size	Completed	Length (in minutes)				
One	285	20.2				
Two	727	29.9				
Three	399	31.6				
Four	611	39.2				
Total	2,022	30.2				

- Reporting of Income. 100% of the households that participated in the household activity survey provided annual household income data. Of these, 76% provided the information during the initial recruitment call; 18% provided the information during the data retrieval call, and 6% provided the information during a subsequent call. ETC Institute's interviewers explained the importance of providing the household income data during the initial recruitment, which is the reason the majority of participants provided the information early in the process. During retrieval process, participants were told that their data may not be useable if the income data was not provided. If a household still refused to provide the information, a senior manager from ETC Institute called the household to explain the reason the income data was needed. At this point in the process, all households that had not provided income information agreed to do so.
- Mail Packet Returns. Of the 2,022 households that participated in the survey, 1,754 provided their travel data by phone. A total of 1,399 (1,122 households returned diaries for the entire household) households returned their completed travel diaries by mail following the retrieval of the data by phone. A total of 51 households returned their travel diaries by mail only and did not participate in a debriefing by phone. Overall, the quality of the surveys returned by mail only was comparable to the quality of the surveys that were completed by households that provided travel data by phone.

 Thank You Letter. After ETC Institute had received all completed surveys from a household, ETC Institute sent the household a note thanking them for their participation.

Conducting the Passive GPS Survey

ETC Institute asked each of the households that were recruited for the household travel survey to also participate in the passive data collection effort. The goal was to have a sub-sample of approximately 10% of the households recruited for the travel-diary survey to also participate in the passive GPS survey. To encourage participation, ETC Institute offered incentives to all households that participated in the passive GPS survey. Households with one vehicle received \$50; households with two vehicles received \$75, and households with 3 or more vehicles received \$100.

Sampling Plan. Tables 5 and 6 show the sampling goals and the actual number of completed passive GPS surveys that were obtained for each combination of household size and income. A total of 200 passive GPS surveys were to be completed.

Table 5
GPS Survey Sampling Goals by Type of Household (WFUTS)

	Household Size				
Income Ranges	1	2	3	4+	Totals
\$0 to \$17,499	10	10	1	0	30
\$17,500 to \$32,499	10	15	20		45
\$32,500 to \$49,999		15	1	5	35
\$50,000 to \$74,999	15	15	10	20	50
\$75,000 +		15	10	10	40
Totals	35	70	60	35	200

Table 6
Distribution of Completed GPS Surveys by Type of Household

(WFUTS)

	Household Size				
Income Ranges	1	2	3	4+	Totals
\$0 to \$17,499	10	9	1	0	29
\$17,500 to \$32,499	11	16	22		49
\$32,500 to \$49,999		16	17		39
\$50,000 to \$74,999	17	18	12	21	57
\$75,000 +		16	11	11	43
Totals	38	75	47	57	217

All households that agreed to participate in the household survey were eligible to participate in the passive GPS survey. The level of interest in participating in the passive GPS survey was significantly lower among low income households (see Table 6). In order to offset the lower response rate among the smaller (two or less), low income cells, ETC Institute offered all households in the lower income category with more than two occupants \$100 regardless of the number of vehicles. Even with the incentive, lower income households were less willing to participate in the WFUTS area.

GPS Equipment. ETC Institute used G-Log 760 Trip Recorders to collect the

majority of the GPS survey data. The G-Log 760 unit is battery operated unit with a motion detector and a self-contained antenna. The G-Log 760 unit pauses when the car is not in motion and the units were programmed to stop recording if the vehicle speed fell below five miles per hour for a continuous period of 30 minutes or more. No effort was required by travel survey participants to turn the unit on or off. The devices were

placed in the windshield, or other area where signal would not be disrupted. If the vehicle had a working cigarette lighter, ETC Institute connected the GPS device to the lighter to provide backup power in the event the batteries failed.

Recruitment. A total of 288 households agreed to participate in the passive GPS Survey during the initial recruitment call. Of the 288 that originally agreed to participate, 217 actually participated in the passive GPS survey.

Rather than having ETC Institute staff drive to each of the participating households homes, ETC Institute installed the GPS devices at central locations in the Wichita Falls area. Households that agreed to participate in the GPS Survey met ETC Institute representatives at a central facility to have the GPS device installed. Hotels were used for the installation and retrieval locations.

GPS Administration Process. Households that participated in the passive GPS data collection were involved in the project for three days:

- Day 1: The recruited households drove their vehicle(s) to a designated location in the Abilene metropolitan area. ETC Institute's bilingual staff installed the G-Log 760 and explained how the GPS device works. Final instructions and a hands-on demonstration were also given to each participant so that they understood how to properly record information on the written portion of the activity travel diary and to ensure that they understood how the GPS devices worked.
- ➤ Day 2: All household members recorded their travel information on the written household travel diaries. The G-Log 760 recorded all vehicle travel data. The GPS data was only collected while the vehicle was in operation. Participants were given a local phone number to call if they had any questions.
- ▶ Day 3: All households returned to the same location where the G-Log 760 was originally installed. Prior to returning, they called ETC Institute's call center and the travel data was retrieved by phone. Once the household had successfully communicated their travel data to ETC Institute's call center, they were instructed to return to the location where the GPS device was installed so that ETC Institute staff could retrieve the device. Once the household had returned the device and submitted the appropriate paperwork, the participants were given a cash incentive for their participation.

GPS Data Elements. The following types of GPS survey data were collected by ETC Institute:

- The position of the vehicle by longitude and latitude in one second increments and the time and date at each position.
- Distance and direction traveled since the last position.

- Vehicle's distance, speed, elevation, date, and heading.
- Times (by hour and minute) when survey vehicle engines were turned on and turned off.

The GPS data was delivered to TxDOT in an ASCII comma delimited format. Information that was submitted as part of the GPS Administrative File included the following:

- 1. GPS Unit ID Number
- 2. Household ID Number
- 3. GPS File Name
- 4. Vehicle Number
- 5. Household Travel Date
- 6. Vehicle Year
- 7. Vehicle Make
- 8. Vehicle Model
- 9. Beginning Odometer Reading
- 10. Ending Odometer Reading
- 11. Installation Date
- 12. Installation Time
- 13. Removal Date
- 14. Removal Time
- 15. GPS Power Source
- 16. Type of Vehicle

Verifying and Editing Survey Data

ETC Institute prepared four data files for the household travel survey including:

- Household Information file
- Personal Information file
- Vehicle Information file
- Activity/Trip Information file

ETC Institute conducted data processing and geocoding activities concurrently with the data collection task. This allowed a higher level of control on the quality of the completed data, since the daily attention to completed households allows for quick identification of where interviewer training may need to be strengthened.

As data were compiled into the database, they were edited and corrected. A data analyst from ETC Institute conducted ongoing verification of this aggregate, cumulative data file. ETC used a specialized program that was provided by TTI to perform routine and customized quality checks on the data to confirm that

submitted data met TxDOT's standards as well as the project requirements. The edit check program was used to check the following:

- Data range checks to ensure data are not outside the expected ranges;
- Data checks for missing data, including a flag for persons who report no travel (this will be done by a combination of computerized queries and direct data viewing);
- Checks for high frequency of refusals or "don't know" responses (indication of item non-response);
- File consistency (household size matches number of person records, etc.);
- Consistency between arrival and departure times;
- Employment data for all respondents reporting a "work" activity; and
- Consistency among shared trips within the household.

Data validation was accomplished by comparing each record in the database against the criteria for a completed household established at the beginning of the project. ETC Institute sent "interim" data sets to TxDOT for review against the criteria for a completed household that were established at the beginning of the project. By allowing TxDOT to review the format of the data early in the project, ETC Institute was able to make adjustments in the structure of the database to ensure that the final datasets were in the format required.

ETC Institute then coded and entered all data into pre-specified ASCII file formats and forwarded the data to TxDOT. ETC Institute ensured that all text and data files were free of viruses.

Processing and Geocoding Methodology

The objective of this task was to geocode the survey responses by home address, work address and other destination addresses to study area polygon layers including counties, zip codes, and TxDOT travel demand model's traffic analysis zones. The geocoding process built a spatial (x, y coordinate) database of the survey information supporting the development of trip generation rates and trip distribution parameters to be used in TxDOT's regional travel demand model.

Pre-Processing of Survey Records. ETC Institute used several iterative data integrity checks and applied corrections before actual geocoding was conducted.

This included standard checks for duplicate records and corrections to the spelling of street names and zip codes as well as a number of specialized write-queries designed to identify and fix any suspect data. This process of data preparation resulted in the high quality of the survey databases.

Geocoding Process. ETC Institute used a suite of modern software tools such as TransCAD, ArcView, Manifold GIS, and several custom geocoding and quality control engines to locate the survey records. Longitude and latitude were coded to an address, intersection, or site specific place name to within an accuracy of 1000 feet using six decimal places. The key activities comprising the process and the approach to the geocoding process include:

- Developing consistent initial data coding (recording) requirements
- Acquiring and preparing suitable location reference GIS layers
- Geocoding the initial (pretest) results against the best reference layers
- Discussing data quality and requirements with TxDOT staff and implementing process revisions
- Merging all survey responses into a single database
- Preparing survey responses for geocoding
- Iteratively geocoding survey records and verifying match (hit) rates
- Modifying geocoding process and reference data as needed to increase total matches

Geocoding logic checks were performed on the survey database against the reference theme address database to check for inconsistencies. Any records that were not compatible with the source database were flagged for inspection.

The basic process for geocoding the data involved the following steps: First, trip end addresses with zip codes were coded. This included the subset of trip end addresses that corresponded to the household addresses (trips ending at HOME). Next, an attempt to geocode the remaining (unmatched) trip end addresses was made by making use of the geocoding software's ability to use location indices in place of zip codes to locate valid addresses. For each record, the geocoding engine tried to locate the trip end address by parsing through the street network within the state/city specified for the address. The remaining (unmatched) records were then further processed in small batches (address modifications/cleanup, intersection address format cleanup, manual geocoding to highway addresses and landmarks/businesses).

TransCAD was used as the main geocoding engine for the more complex portions of the database. While ArcView (now ArcGIS) was used as the primary geocoding tool where reference address layers were of high quality, additional coding flexibility was often needed for more complex or voluminous data sets. Upon satisfactory completion of the geocoding process, ETC Institute provided TxDOT with a complete set of all geocoded data files.

Summary of Appendices to This Report

This report contains six appendices. A brief description of each appendix is provided below:

Appendix A. This appendix contains tables that show the *household data* for Wichita County. The types of household data that are provided in this appendix include: household occupancy, vehicle availability, type of residency, years of residency, annual income, and raw (unadjusted) household trip rates.

Appendix B. This appendix contains tables that show the **person data** for Wichita County. The types of person data that are provided in this appendix include: age, ethnicity, employment status, bicycle use, and other personal information.

Appendix C. This appendix contains tables that show the *vehicle data* for Wichita County. The types of vehicle data that are provided in this appendix include: types of vehicles, year of vehicles, vehicle make, type of fuel used, and other vehicle information.

Appendix D. This appendix contains the *recruitment script* that was used to solicit participation in the survey.

Appendix E. This appendix contains the *retrieval script* that was used to gather data from households after they completed their travel day.

Appendix F. This appendix contains copies of the household travel diaries and notification letters.

Appendix D: Recruitment Script

Texas Department of Transportation 2010 Wichita Falls Regional Household Activity/Travel Survey Recruitment Interview – Final

INTRO

READ: "This is [YOUR NAME]. I'm calling for the (speak slow and clear for name recognition) Texas Department of Transportation.. We are not selling anything. The reason I am calling is that we need input from residents to plan transportation improvements in the Wichita Falls metropolitan area. Would you have a few minutes to help us with this study?"

01 Yes (GO TO SCRIPT) 02 No (GO TO OTHER TIME)

OTHERTIME When would be a good time to call you back?

Day: _____ Hour: ____

READ: "Thank you for your time we will call you back on [Day] at [Hour].

SCRIPT

"Thank you. Your household was selected at random to participate in a household activity/travel survey that will be used by the Texas Department of Transportation to plan new and improved transportation facilities for residents of the region."

"Since travel patterns in our region are often related to household size, vehicle availability and income, I am going to ask you a few demographic questions to ensure that our sample is representative of the households in the region. All of the information you provide will be kept completely confidential."

H8: Advance Letter

"Do you remember receiving a letter in the mail recently about this project?"

- 01 Yes (**GO TO 18YEARS**)
- 02 No (GO TO RESEND)
- No Letter Sent (GO TO RESEND)
- 98 Don't Know (GO TO 18YEARS) 99 Refused (GO TO 18 YEARS)

RESEND

"We will send you another letter in the next days that will provide more information about this study. Are you willing to continue now without the letter" (TERMINATE)

(PROGRAMMER: Include only if H8 = 02/03)

01 Yes (**GO TO 18YEARS**) 02 No (**GO TO CONFIRM**)

<u>CONFIRM</u>					Can I confirm that your home ferent: Enter Correct Address:

HOUSEHOLD INFORMATION FILE

H16: NUMBER PERSONS

"Including yourself, how many people live in your household? Please do NOT include anyone who usually lives elsewhere or is just visiting, such as a college student away at school." (INTERVIEWER: Include roommates and housemates. Do NOT include children living away from home.) (RECORD TOTAL NUMBER OF HOUSEHOLD MEMBERS)

___ (PROGRAMMER: Allow 1 to 15.)

H17: NUMBER EMPLOYED PERSONS

"How many persons in your household, including yourself, are currently employed either full or part time?"

___ persons (PROGRAMMER: Must be equal to, or less than, H16.)

H18: VEHICLE AVAILABLE

"To understand your household's travel, we need some information about the vehicles available to your household. Please count all owned and leased cars, vans, trucks, motorcycles, and mopeds that are working, as well as vehicles available for REGULAR USE to your household, such as company vehicles. How many working vehicles do you have available to members of your household?" (RECORD NUMBER OF HOUSEHOLD VEHICLES AVAILABLE)

___ number of vehicles (PROGRAMMER: Allow up to 10.)

98 Don't Know (**GO TO H20**)

99 Refused (**GO TO H20**)

H19: VEHICLES OWNED

"How many of these vehicles are owned by you or other members of your household? Consider vehicles that are being leased or for which the household is making payments on a loan to pay for the vehicle as being owned."

__ _ number of vehicles owned (PROGRAMMER: Allow up to 10.)

98 Don't Know (**GO TO H20**)

99 Refused (**GO TO H20**)

VEHICLE INFORMATION FILE

VEHINTRO

READ: "Now I have a few questions about each of these vehicles. Let's start with the newest vehicle.

V4: TYPE OF VEHICLE

"What TYPE vehicle is (Vehicle_#)? Is it a:"

- 01 Motorcycle (includes mopeds)
- O2 Car (includes station wagons)
- Van (mini and passenger)
- 04 Sport Utility Vehicle
- 05 Pickup Truck
- Cargo Transport Vehicle (a vehicle used to carry commercial goods and cargo)

CLOSE

"We will mail activity/travel diaries to you in a few days for each member of your household. When you receive them, just follow the directions and have each member of your household complete the diaries on the day indicated. An adult member of your household can help children complete the diaries. If you have any questions about the survey's legitimacy, you may call NEED NAME OF LOCAL CONTACT and PHONE NUMBER.

"It is very important that everyone in your household complete the diaries on the same day. After you have completed the diaries, please return them to us as soon as possible in the postage-paid envelope that will be provided."

"Before I end this call, do you have any questions?"

We appreciate your help. If you have questions, please call toll-free 888-801-5368 and ask for Terry.

Appendix E: Retrieval Script

Texas Department of Transportation 2010 Wichita Falls Area Household Activity/Travel Survey Retrieval Script – Draft 1

THANKS.

"Although we completed your interview over the phone, we appreciate it if you would mail in your activity/travel diary. Thank you very much for your participation in this survey."

Appendix F: Travel Diary and Other Survey Packet Materials

Wichita Falls Regional Household Activity/Travel Survey

Greetings:

The Texas Department of Transportation (TxDOT), in cooperation with the Wichita Falls Metropolitan Planning Organization (MPO), is conducting a survey of more than 2,000 households in Wichita County to better understand how and why people in your area travel. The information from the survey is one of the most important data collection efforts for the region. The results will be used by TxDOT and local communities to plan future transportation improvements for the area.

Your household was selected at random to participate in this survey. Although your participation is voluntary, we hope you will consider making it a priority to ensure that residents of your area are properly represented.

In a few days, a trained interviewer from a survey research firm, ETC Institute, will call and ask you some questions about your household. ETC Institute has been contracted by TxDOT to administer the survey. The information you provide will be kept confidential and will only be used for statistical purposes.

If you have any questions about the Household Activity/Travel Survey, please contact the project manager, Chris Tatham, at 1-888-801-5368. Thank you in advance for your participation.

Sincerely,

Charlie Hall

Travel Survey Program Manager

Texas Department of Transportation

Wichita Falls County Regional Household Activity/ Travel Survey

Thank you for agreeing to take part in the Wichita Falls Regional Household ctivity/Travel Survey. ETC Institute, a survey research firm, is currently administering this important survey on behalf of the Texas Department of Transportation and the Wichita Falls Urban Transportation Study (WFUTS). By sharing your household's travel information, you are helping to determine and plan for the transportation needs of residents in the metropolitan area.

As we explained in our recent telephone call, this packet provides the materials your household will need to record your activities and travel for our interview, including an activity/travel diary for each member of your household. An example of how to complete the activity/travel diary is provided on the back of each diary.

After your assigned travel day, please MAIL in ALL of the household diaries completed for your household in the postage paid envelope which is provided for your use.

If you prefer to do this by telephone, an ETC Institute interviewer will call you to collect your household's information. If you prefer to do this by telephone, we would like to talk to each person age 16 or older individually, but ask that an adult respond for younger household members. An adult can provide the information for another person 16 or older if that person is not present at the time we call.

Please remember that the information you give us will be used for research purposes only. Nothing will be shared that could identify you or your household. We really appreciate your participation – it is extremely important for planning future transportation in your area.

If you have any questions, please call the survey team toll-free at 1-888-801-5368.

Thank you once again for participating in the survey.

Sincerely,

Chris Tatham
Senior Vice-President
ETC Institute

Instructions

Please tell us about <u>ALL locations you traveled to, what you did,</u> and <u>how you got there,</u> beginning at 3 a.m. Include all changes in location you made whether you were traveling by vehicle, bus, bike, walking, or other means. Give us as much information as you can about each location or place you stopped, no matter how short. For example, if you stop to get gas on your way to work, please record both locations separately. Also, <u>try to record as much detail about the address as possible.</u> For example, write 123 N. Main Street instead of 123 Main.

If you have any questions, please call 1-888-801-5368 ETC Institute

If someone stays home all day, mark	k diary Location 1 "stayed home all day" and re	eturn.		

2010 Wichita Falls Regional HOUSEHOLD ACTIVITY/TRAVEL SURVEY

If someone is out of town or away from residence for entire day and night,

Mark diary Location 1 "out of region all day" and return.

Wichita Falls Regional Household Activity/Travel Survey

Dear < NAME>:

On behalf of the Texas Department of Transportation and the Wichita Falls Metropolitan Planning Organization (MPO), ETC Institute would like to thank you for your participation in the 2010 Wichita Falls Regional Household Activity/Travel Survey.

By sharing your household's activity and travel information, you are helping to determine and plan for the transportation needs of the greater Wichita Falls area.

If you have any questions, please give me a call toll-free at 888-801-5368.

Sincerely,

Chris Tatham
Project Manager
ETC Institute
